

# STUDENTS' COUNCIL

---

Tuesday October 22<sup>nd</sup>, 2013  
ETLC 1-018

## ORDER PAPER (SC 2013-12)

### 2013-12/1 SPEAKER'S BUSINESS

2013-12/1a Announcements – The next meeting of Students' Council will take place on Tuesday, November 5<sup>th</sup>, 2013

### 2013-12/2 PRESENTATIONS

2013-12/2a Student Group Policy Changes sponsored by William Lau, VP Student Life

Student Affairs Officer Norma Rodenburg and Discipline Officer Deb Eerkes will provide an update surrounding the proposed student group policy changes and the rationale behind them. Unfortunately, Student Group Services staff will be unable to join us, but their feedback will be forwarded to Vice President (Student Life) William Lau.

2013-12/2b Peter Lougheed Leadership Initiative, presented and sponsored by Dustin Chelen, VP Academic

The University is proposing a fundraising campaign focused around the Peter Lougheed Leadership Initiative. This includes fundraising to support things like undergrad research and study abroad, as well as increased partnership with the Banff Centre. However, the University is also rapidly developing a leadership college. This building on the north east edge of main campus would be an elite residence for 144 students selected for their achievements in their first two years, and would expose them to increased leadership training. I'm concerned about the elitism and narrow scope of a leadership college and would appreciate Council's feedback.

### 2013-12/3 EXECUTIVE COMMITTEE REPORT

2013-12/3a Executive Committee Report

Please see document SC 13-12.01

### 2013-12/4 BOARD AND COMMITTEE REPORTS

### 2013-12/5 QUESTION PERIOD

2013-12/5a To Josh Le, VP Operations and Finance from Councillor Mohamed

I noticed that "Take Back the Term" costs each student \$20 to attend. What revenue do we receive from this program and would it be possible to make it free for students to join?

2013-12/6

**BOARD AND COMMITTEE BUSINESS**

2013-12/7

**GENERAL ORDERS**

2013-12/7a

**HODGSON MOVES** the approval of the 2012/2013 auditors report.

2013-12/8

**INFORMATION ITEMS**

2013-12/8a

CAC Summary Report

August 30

LAU/KUSMU MOVED THAT the Executive Committee approve a project allocation not exceeding \$550.00 towards the booking of a School Bus on September 4<sup>th</sup>, 2013 to strengthen University of Alberta North Campus and Augustana student relations.

**4/1/0 CARRIED**

September 12

KUSMU/WOODS MOVES that the Executive Committee approve the Advocacy Outreach and Campaigns Officer (AOCO) job description for 8 months and with pay that is comparable to the EPIO/UPIO student positions.

**5/0/0 CARRIED**

September 17

CHELEN/KUSMU MOVE THAT the Executive Committee approve an additional allocation of \$350 for the purpose of printing an annual report.

**5/0/0 CARRIED**

September 18

CHELEN/KUSMU MOVED THAT the Executive Committee approve a contingency fund allocation not to exceed \$2860 for the purpose of elections support for faculty associations and the Dentistry Students Association.

**5/0/0 CARRIED**

September 20

CHELEN/KUSMU MOVED THAT the Executive Committee approve a projects allocation not exceeding \$600.00 towards the purchasing of 4 new microwaves to be installed in Central Academic Building to replace current dysfunctional microwaves.

**4/1/0 CARRIED**

CHELEN/KUSMU MOVED THAT the Executive Committee approve a projects allocation not to exceed \$250.00 for the purpose of hosting Students' Council on SUBstage on October 8<sup>th</sup>.

**5/0/0 CARRIED**

October 1

CHELEN/KUSMU MOVE THAT the Executive Committee approve an additional \$250 for the purpose of printing and designing the SU Annual Report.

**4/0/1 CARRIED**

October 3

LAU/LE MOVE THAT the Executive Committee approve \$500.00 for the purposes of Sustain SU's SUSTAINexchanges from the Projects Allocation fund.

**3/1/0 CARRIED**

CHELEN/LAU MOVE THAT THE that the Executive Committee approve to send the General Manager to the AMICCUS-C Regional in Edmonton, October 22-24, 2013.

**4/0/0 CARRIED**

# COUNCIL ADMINISTRATION COMMITTEE MEETING SUMMARY REPORT TO COUNCIL

*Date: October 8<sup>th</sup> 2013*

*Time: 5.06 pm*

2013 – 2014

## **Motions**

1.	<i>MILLS</i> moved to <i>approve the agenda for October 8, 2013 as tabled.</i>	<i>CARRIED</i>
2.	<i>BANISTER</i> moved to <i>approve the minutes for September 24, 2013 as amended.</i>	<i>CARRIED</i>
3.	<i>MILLS</i> moved to <i>adjourn the meeting.</i>	<i>CARRIED</i>

October 17, 2013

To: Students' Council 2013-2014

Re: Report of the Vice President Academic

---

Hello Council,

Below you'll find an update of my activities from the past two weeks.

## **I. Fall Reading Week**

The SU President and I have been doing a lot of background work on a Fall Reading Week. I've been working away on some of the minor details that are causing administration discomfort. In particular, we're attempting to work with the Registrar and Dean of Engineering to ensure that the minimum number of instructional minutes never dips below acceptable levels while not adding extra work to the RO. This has been a major focus for me over the past two weeks.

## **II. COFA Working Groups**

After the COFA Senior Board meeting two weeks ago, the "Finance and Admin" and "Advocacy" working groups met to discuss the projects delegated to them. We worked on a proposal for FA-specific awards, enhanced communication structures, and increasing the understanding of tuition and fee governance. I'm impressed at the commitment to collaboration that FA Executives have shown this year.

## **III. Miscellaneous**

The past two weeks have been spent mostly on a miscellany of meetings and projects that will produce more tangible results in the future. I met with the Dean of Students, Provost, Vice Provost Academic Programs and Instruction, Registrar, and Director of International Student Programs and Services around Fall Reading Week. I met with the Vice President Advancement surrounding the leadership college. I met with the Provost to discuss the way forward for affirming U of A student attributes. I worked with our external consultant to finalize the student experience survey for November. I worked with the RO and the Office of Student Judicial Affairs to come up with policy around text matching software. And I attended meetings of GFC Exec, ASC SOS, ASC, and TBAC MBAC. Excluding that last meeting, I've unfortunately received very little correspondence from the University over the past two weeks regarding the proposed 14-15 budget cuts.

If you have any questions or concerns, please don't hesitate to call me at 780-492-4236, or email me at [vp.academic@su.ualberta.ca](mailto:vp.academic@su.ualberta.ca).

Sincerely,

Dustin Chelen

October 22<sup>nd</sup>, 2013

To: University of Alberta Students' Council 2013/2014

Re: Council Report of the Student Life Portfolio

---

Dear Council,

Top priorities have been: 1) International Student Issues Town Hall, 2) DSA U-Pass Referendum, 3) Athletics Promotions, and 4) Student Group Policy/Procedure changes.

### **Engagement**

- Heroes for Health (H4H) Challenge – There are roughly 150 students participating this year! I hope to see you all there, to enjoy the ideas that our students come up with to create a healthier campus. Register online for the symposium at [www.heroesforhealth.ualberta.ca](http://www.heroesforhealth.ualberta.ca)
- Council Outreach – An ideal source of info for class talks might be our monthly newsletter... :)
- Athletic Promotions – October 25<sup>th</sup>. It's a Legacy Game, meaning that it is free entry for all OneCard holders! 500 free burgers just got approved – hope to see you all there at the Clare Drake arena! Will be working with Athletics to see if we can organize a pep rally as well!
- Programming and Venues Department – Campus Cup has launched! I would love to see Council submit a team! If not council, submit a team for your faculty!
- Student Group Procedural Changes – I have attached the most recent draft of the proposed changes. The three areas that the SU is focusing in on are:
  - Creating an appeals body with more than one individual;
  - Clarifying the governance route, ensuring that changes must pass through a democratic process;
  - Clarifying the SU's role in Student Group management.
- Academic to World of Work Transition Project – An interesting opportunity was presented to exec over email with a program that would offer students from various backgrounds to tackle case studies together in an industry boardroom with the facilitation of their management. More to come within the next three weeks.

**Food**

Microwaves for CAB are installed; three in the lower level of CAB, and one by the Cameron Library Starbucks. By placing microwaves near Aramark vendors, they will take care of maintenance of the microwaves as long as we provide them. Marketing is currently putting together laminated signs that will highlight that 1) These are provided by your SU, and 2) please let the friendly Aramark staff around the corner know if the microwaves need some cleaning. I will continue working with Ancillary Services to see which other Aramark locations would be sensible locations to place microwaves.

I have clarified some things around the Community Kitchen. It is close to bookable spaces in PAW as well as a loading zone and elevators. Unfortunately, the space we have is small (roughly 20'x20'), which means that it will be more of a teaching kitchen where students would sit and watch, rather than one where students could cook alongside the instructor. On the bright side, it will be cheaper to furnish...

**Health and Wellness**

At a recent Health Centre Advisory Group meeting, budget cuts were mentioned, and we are anticipating a discussion around how the cuts made to the Dean of Students' Office will affect the health services provided on campus. The Executive Director of University Wellness Services that we have worked with has already taken voluntary severance, as well as a pharmacy manager and an admin staff member.

Besides that, flu clinics will be running in November on North Campus, more information will be available later. Dr. Robin Everall also presented her Student Mental Health Report (also attached) and looks promising!

Relating to student health, Councillor Nguyen and I approved Access Fund applications today and really felt how students under financial stress also had many other issues going on their life. If we highly value student health and wellness, financial supports must be addressed as well.

### **Internationalization**

Town hall will have been over by the time we have our meeting. Some notes will be available at

[http://padlet.com/wall/ualberta\\_intnl](http://padlet.com/wall/ualberta_intnl)

1. International Student Tuition – I am supporting a group of international students that want to sign a petition to request specific asks from the University. The petition's asks are attached, and will be distributed at the Town Hall.
2. Building an International Students' Association (ISA) – I have already collected feedback from the Indian Students' Association, the Chinese Students and Scholars' Association, the Filipino Students' Association and the Chinese Students' Club. Different individuals are contacting different clubs; the SU exec is currently managing calendars to ensure that an exec will always be at an ISA discussion (Fridays at 6pm) to facilitate and resolve conflicts.
3. Strengthening domestic-international student interactions – I am supporting a pair of domestic students that wish to launch a campaign in January to promote domestic-international student interactions. The campaign would build-up to a launch of a documentary during International week to support a similar message. They have started filming anecdotes and we are discussing how the Dean of Students' could support this project.

### **Public Transit**

We have released a public statement in response to the City's written response.

<http://su.ualberta.ca/about/news/entry/249/students-request-fairer-transit-fines/>

As ETS feels that it is outside their purview, this issue will either be discussed with the Municipal Legal Affairs, or at the Council level by amending the bylaw. Municipal elections present an interesting opportunity.

### **Sustainability**

Sustainability Awareness Week is this week (Oct 21-25!) Check out some of the events! (also attached)

Cheers,

William Lau

# Student Mental Health at the **University of Alberta**

FINAL REPORT OF PROVOST FELLOW

Dr. Robin Everall

Edmonton, Summer 2013

# EXECUTIVE SUMMARY

In alignment with the University of Alberta's initiative to delve into the state of student mental health services on its campuses, a Provost Fellow, Student Mental Health was tasked with examining services available to University of Alberta students, exploring best practice at other institutions, and producing a report to guide relevant, responsive and accessible mental health strategies and initiatives.

Fifty four recommendations are organized into 10 categories.

## A VISIBLE CAMPUS COMMITMENT

Emphasizing the importance of student mental health at the University of Alberta requires a strong and visible endorsement by senior administrators. The renewed commitment will provide a lens that will be considered in policy and procedures development across the institution.

## EXPAND WELLNESS INITIATIVES AND RAISING THEIR PROFILE

The importance of removing structural barriers and the importance of increasing peer support are addressed. Encouraging student-initiated mental health programming is an important area to focus upon in the future.

## DEDICATED RESOURCE ALLOCATION

Sustained and cohesive initiatives require secure funding envelopes. Recommendations include the need for more physical space and financial sustainability.

## COHESIVE MENTAL HEALTH AND WELLNESS PROGRAMMING

All student services, including disability services, academic services, spiritual services, ombud services or mental health and/or wellness services, deal with students impacted by mental health issues. Reducing silos will hasten the movement to more streamlined and adequate access and will allow diverse units to collaborate more effectively. Less visible services for students, whether available at the department, faculty or unit levels need to be included in the larger conversation about student mental health.

## EDUCATING OUR COMMUNITY

Recommendations include developing workshops and training sessions for faculty, staff and APOs to educate them about the changing needs and expectations of students, creating handbooks and resources for parents and students. Modifications to the mental health training programs offered at the University of Alberta are recommended.

## **COMMUNICATIONS STRATEGIES**

An efficient and effective and integrated communication strategy is essential to ensuring that information about the availability and breadth of mental health services at the University of Alberta is accessible to students, parents, and university personnel.

## **STRUCTURAL RECOMMENDATIONS**

A university infrastructure needs to be created to develop campus-wide mental health initiatives. Recommendations include the creation of a committee structure tasked with prioritizing, developing, and overseeing the implementation of mental health initiatives across the institution. An expansion of the Helping Individuals at Risk program is strongly recommended as is the development of a new policy for dealing with students severely impacted by mental health issues.

## **ORIENTATIONS**

A thorough overview and evaluation of all departmental, faculty, service unit, and association orientations needs to be completed. Orientation content, delivery models, and scheduling need to be carefully scrutinized to ensure that students are receiving accurate and adequate guidance as they embark upon their academic careers.

## **INTERNATIONAL STUDENTS**

In conjunction with the increasing numbers and cultural diversity of international students comes the need to re-evaluate how targeted services are designed and delivered. Recommendations focus upon augmenting the ability of international students to become meaningfully engaged in the university-at-large as well as the general community.

## **OUTREACH**

Alumni are a most valued resource of the University of Alberta. Augmented involvement in student mental health initiatives, specifically, would benefit the university community. A formal relationship with Alberta Health Services would facilitate the provision of ongoing medical and psychological supports for students with serious mental health issues.

In addition to the recommendations, the report outlines structural changes to student mental health services that were completed in 2012 that provide the foundation for restructured services in 2013 and onward.

# INTRODUCTION

The desire to enhance and improve the way the University of Alberta approaches and deals with student mental health and wellness is rooted in the institution's ongoing dedication to fostering student success and student retention. One needs to look no further than the integral commitment made by our founding president Henry Marshall Tory, that the University of Alberta would serve to 'uplifting the whole people.' Indeed, our current president, Dr. Samarasakera has recently recast this promise in individual terms, stating that "we begin by uplifting the whole person, one person at a time" (speech, March 15, 2013). This pledge is infused into the Dare to Deliver, Academic Plan, 2011-2015: "It is also important...that students have the range of effective and appropriate supports that allow them to fully realize their potential during their time at the University of Alberta. ... When we focus on our students, we consider the student holistically."

In alignment with the University of Alberta's initiative to enhance the student experience, my appointment as Provost Fellow, Student Mental Health was created in January, 2012 to examine services available to our students dealing with mental health issues. This initiative aligns with the increased public scrutiny of North American post-secondary institutions to ensure that adequate mental health services are available to their students. It also correlates with increased attention on mental health issues in the public sphere. The creation of the Alberta Lieutenant Governor's Circle on Mental Health and Addiction is just one example of the focus on the impact of poor mental health on society at large.

The importance of mental health issues and their impact upon student engagement and academic success is receiving increasing attention in post-secondary institutions across North America. The academic experience occurs in the larger context of a student's life that has increasingly complex demands and pressures. Personal expectations, interpersonal challenges, academic demands, and life transitions, represent psychosocial or environmental stressors that may impact academic success. Although traditionally mental health issues in post-secondary populations were undervalued and an often dismissed influence upon academic achievement, there is growing consensus in the research community that these issues are becoming more complex, chronic, and severe. In a report completed by the Canadian University Survey Consortium (2011), more than 1% of Canadian undergraduate students identified themselves as having a learning or mental health disability that created obstacles to academic success and 18% reported using student counselling services that were available on campus. It is not a stretch to surmise that for some students already struggling with mental health issues, academic demands may negatively impact their mental health over the course of their academic careers. Because of the breadth and severity of documented student mental health challenges, post-secondary institutions have a seemingly overwhelming task of providing adequate services to their students and providing support structures that facilitate academic success. For a university as large and complex as the University of Alberta, this is a critical issue that requires careful scrutiny and strategic planning and constant assessment.

In order to fulfill the mandate assigned by the Provost to investigate student mental health services, the following questions were asked:

- How does the University of Alberta provide relevant, responsive and highly accessible mental health services to its students?
- Is there a need to increase capacity and offerings for the delivery of mental health services?
- How does the U of A increase its capacity to provide adequate mental health services to its' students?

To answer these questions, it was necessary to: identify the landscape of mental health services on our campuses to determine if there were overlaps or gaps in services; develop a model or models to enhance service availability; and propose a strategy to enhance support and mental health services for students. To ensure that perspectives from a spectrum of stakeholders had input into the report, senior administrators, faculty members, APOs, sessional and contract staff, support staff, mental health specialists, graduate students, undergraduate students, and external stakeholders were consulted. What follows includes: the results of an examination of the University of Alberta's current mental health services and delivery models, recent modifications to services based upon these findings, and recommendations for further improvement on our campuses.

To identify best practices suitable for the University of Alberta, the search needed to be completed with institutions that are comparable in structure, mandate, and size. A one-size-fits-all model is not appropriate for our large, research and teaching intensive university, therefore it was important to think creatively about how to best meet student mental health needs in our complex institution. Institutions large and small are challenged to develop strategic plans that will guide student service initiatives within the contexts of the size and nature of the institution and its access to sustainable funding sources. The emphasis on mental health grows as a burgeoning body of

research provides evidence that meeting student service needs creates a safe and supportive learning environment in which students thrive and succeed in their personal and academic endeavors. Health - physical, spiritual, emotional, and mental - are integral to realizing one's potential and achieving one's goals. Moving the University's initiatives forward requires insight into the connections between student mental health, learning and academic achievement, and student engagement as a constellation of factors that contribute to student success. In 2003, the Healthiest Campus Taskforce was created to make recommendations on moving toward a cultural shift. In 2009, the Provost's Advisory Task Team on Student Engagement built upon previous reports and made specific recommendations that would enhance the student experience and forge strong connections between student communities and our university. With this in mind, examining mental health and institutional best practice cannot be investigated in isolation.

## WHY NOW?

The revelation that mental health impacts student learning and success is not new. In fact, the 1911, the Joint Committee on Health Problems in Education identified health education, health services, and a healthy environment as the three components required to support student mental health (Silverman, Underhile, and Keeling, 2008). More recently, following tragic incidents on university campuses that were perpetrated by students with mental health difficulties, the importance of the issue has again been highlighted and high profile incidents in other countries have garnered considerable attention. While fewer in number, significant incidents closer to home have increased attention and raised concerns about mental illness, particularly the relationship with harm to self and to others, on campuses across the country. With increasing evidence that mental health has a significant impact upon on students' learning, discovery and citizenship, universities are responding to the new reality and more demanding expectations from students, parents, and society.

### Mental Health, Mental Illness and Mental Wellness

The terms 'mental health' and 'mental illness' are often used interchangeably and often call to mind those individuals who are suffering from severe and incapacitating disorders. Likewise, within post-secondary institutional contexts, the concepts of 'mental health' and 'well-being' are frequently disconnected. The World Health Organization (2011), however, connects the concepts of mental health

and mental wellness closely by defining mental health as "a state of well-being in which the individual realizes his or her own potential, can cope with the normal stresses of life, can work productively and fruitfully, and is able to make a contribution to her or his own community." The Mental Health Commission of Canada (2011) clarifies the definition by stating that "'mental health problems and illnesses' refer to the full range of patterns of behaviour, thinking or emotions that bring some level of distress, suffering or impairment in areas such as school, work, social and family interactions or the ability to live independently." More generally, mental wellness refers to proactive, supportive environments with approaches that are fundamentally more community-based. These definitions emphasize how the environment influences mental health within the context of everyday experiences and events. Clearly then, individual, systemic, community, and social factors influence mental health, for better or for worse. By extension, the responsibility for mental health does not fit directly into the jurisdiction of any one sector or service, but rather is a responsibility of all who participate in a community. Within the PSE context, an institutional commitment to the promotion of mental health and wellness requires cohesion between policies, procedures, organizational structures, and services.

### Academic Success and Mental Health

The simple fact is that learning, academic achievement, and mental health are intertwined. An emerging body of research demonstrates relationships between mental illness, mental health, academic problems, and academic success (e.g., Heiligenstein & Guenther, 1996; Hunt, Eisenberg, & Kilbourne, 2010). In response to the increased understanding about these interactions, Canadian and American post-secondary organizations have developed compelling plans that

are designed to maximize student mental health initiatives in an academic environment and tie the plans to how they facilitate student success (Canadian Association of College and University Student Services (CACUSS), 2012; American College Health Association (ACHA), 2012). Not surprisingly, comprehensive strategies closely link individual mental health and wellness with the environment in which students function and emphasize that piecemeal, predominantly reactive strategies lack the power to build healthy campuses. The CACUSS (2012) conceptual guide to student mental health is based upon the premise that mental health is an essential component for student academic success and engagement; these are symbiotic relationships. There will be minimal success in improving student engagement and success in the campus community if mental health issues are overlooked.

Therefore, mental health and wellness strategies and plans need to include every level and each individual of the institution. Post-secondary wellness frameworks encompass programs that benefit all who attend an institution by building a strong foundation that supports engagement, community involvement, support for success, personal growth, and academic achievement. Whether institution-specific or more global, services, supports, and opportunities influence the full community. The intent is to make a large campus feel small enough to be engaging and for each student to find a place where they feel they fit and belong. Post-secondary institutions are charged with strengthening all students through opportunities to be involved in peer programming and support, undergraduate and graduate clubs and interest groups, cohorts within specific programs, a learning environment that provides a sense of identify and multiple methods of engagement with the institution, and opportunities for involvement in research such as those supported by the Undergradu-

ate Research Initiative. Every student should be able to find a niche to be “more active and engaged with the Academy” (Dare to Deliver, 2011-2015).

## Changing demographics and mandates

Over the past ten years, societies have begun to acknowledge the prevalence and impact of mental health issues. With the increasing number of societal initiatives to de-stigmatize mental health issues, when speaking to the Canadian Mental Health Association, Dr. John Kirby contended that universities have a “moral obligation” to attend to the mental health needs of their students (Tamburri, 2012). Rising to the challenge, post-secondary institutions are acting proactively and systemically to meet the emerging mental health needs on campuses rather than solely reacting to critical incidents.

On top of this, the 15-24 age range is the single largest group of Canadians who face mental health challenges (Mental Health Commission of Canada, 2011; Eisenberg, Gollust, Golberstein & Hefner, 2007). This is an age when many mental health issues begin to emerge and are most malleable to intervention and amelioration. However, while the post-secondary demographic is the most likely to develop disorders, it is the least likely to seek help. The good news is that parents, faculty, staff and students on campus are increasingly aware of the indicators of mental health issues and are acknowledging students’ struggles when they are observed. By raising the profile of mental health in the society at large, there is an increased acknowledgement of the significant impact of mental health on performance, persistence, and the ability to contribute to society overall. Thus, there

is a perception that mental health issues are more prevalent now than in past generations. Simply put, with growing awareness comes growing demand for services. It is incumbent upon the University and post-secondary institutions to provide these services to ensure that students are able to meet their goals, successfully complete their programs of study, and become contributing members of society.

The demography of today's student population is in flux, changing as it draws from a broader population than ever before. Kitzrow (2009), Zivin, Eisenberg, Gollust & Golberstein (2009), the American College Health Association (ACHA, 2012), the Canadian Association of College and University Support Services (2012) and the Royal College of Psychiatrists (2011) concur that the changing composition of the student body has a dramatic impact upon a university community. The major forces of change include student characteristics, parental expectations and oversight, and increasing numbers of international and non-traditional students, and an increasingly complex world. The environmental impact of financial concerns, developmental challenges, family responsibilities, psychological distress, as well as academic pressures affect the learning experiences of many students.

All post-secondary institutions are grappling with the responsibility to ensure that they are providing safe environments for students and staff to learn, develop, and grow. As such, they face the challenge of determining the extent to which student mental health issues are accommodated in policies and procedures. The University of Alberta, through its *Dare to Discover* and *Dare to Deliver* documents, clearly makes student health and wellness a priority of the institution. The organizational structure of student mental health, welfare and wellness services must reflect the philosophy of a focus on student success. The vision and mission of each faculty, department, and unit

must align with the institutional mission: the value of its students. The U of A is dedicated to fostering an institutional culture based upon a shared commitment to student health, wellness, and success.

## Student Expectations

For most students, pursuing post-secondary studies is far more than obtaining just academic credentials. Students come to campus expecting to become members of a community in which they grow academically, developmentally, and personally. Rodolfa (2008) states "The goal of a campus community that cares is to develop an environment where students feel welcome, feel that they can reach their potential in a healthy supportive environment, and feel they can come to a greater understanding of who they are, who they want to be with, and where they are headed in life." The University of Alberta addresses the aspirations of students in *Dare to Deliver 2011-2015*: "When we focus on our students, we consider the student holistically... How will we know we are making progress? Students report they have the tools and support they need to succeed, including a more student-friendly bureaucracy."

As the diversity of undergraduate and graduate students increases, it is incumbent upon the academy to adapt and deliver services that will contribute to meaningful student engagement and academic opportunities for all. Wellness services, the structures for providing services, and a diversity of available resources are required to keep pace with the changing demographics of our student population. The contemporary challenge is to recognize and accommodate the individual as well as the common aspects of our students. At the U of A we want to create spaces for learning and inquiry that allow our students to feel comfortable in being themselves as well as identify-

ing as U of A students. In striving for this balance, we improve the quality of the university experience while harnessing the full benefit of diversity in our community.

Our programs and services need to be delivered in a coordinated and consistent fashion that meet the needs of all students, avoids duplication and is not sequestered into silos of administrative units. When one becomes a U of A student, her/his individual background comes as well, and this diversity enriches our community. Students need to believe that their culture, religion, gender, and/or ethnic backgrounds are valued and that our institution strives to provide meaningful services that are easily navigable for all students. Fracturing services based upon student status or background creates inadvertent barriers or fosters the perception that mental health support or academic success services are differentially available. This appears to be particularly true for international students who feel disconnected from this institution.

## The U of A Reality

In the spring, 2011, the National College Health Assessment (NCHA) was completed at the University of Alberta for the first time. The NCHA is a research-based student survey that was developed in 2000 and has since been used by major American and Canadian universities to determine and track changes in student mental health, as well as to identify factors that impact student performance, engagement, and success. The survey asked respondents about their alcohol, tobacco, and other drug use, sexual health, weight, nutrition, exercise, mental health, personal safety, and violence. This was the first comprehensive snapshot the University of Alberta had obtained to understand the breadth and depth of mental health issues that our students contend with.

## NCHA data, 2011

Students experienced the following issues within the 12 months prior to the survey:

	<b>U of A Spring 2011</b>	Ontario Cohort 2009	North American Reference Group, 2011	U of A Students (35,500) - survey data extrapolated to a campus statistic
Felt overwhelmed by all you had to do	<b>87.5%</b>	86.3%	89%	31,062
Felt exhausted (not from physical activity)	<b>87.1%</b>	81.6%	N/A	30,920
Felt very lonely	<b>61.7%</b>	57.3%	61.9%	21,903
Felt very sad	<b>65.6%</b>	61.1%	67.7%	23,288
Felt so depressed it was difficult to function	<b>34.4%</b>	31.1%	N/A	12,212
Felt overwhelming anxiety	<b>52.1%</b>	50.6%	52.9%	18,495
Felt overwhelming anger	<b>40.7%</b>	37.1%	N/A	14,448
Seriously considered suicide	<b>6.8%</b>	6.4%	7.2%	2,414
Attempted suicide	<b>1.2%</b>	1.1%	1.2%	426
Intentionally cut, burned, bruised or otherwise injured yourself	<b>4.8%</b>	5.2%	N/A	1,704
Felt things were hopeless	<b>51.4%</b>	45.1%	54%	18,247

Within 12 months prior to survey, students were diagnosed or treated by a professional for the following:

	U of A Spring 2011	Ontario Cohort 2009	North American Reference Group, 2011	U of A Students (35,500) – survey data extrapolated to a campus statistic
Anxiety	<b>8.1%</b>	10.4%	8.8%	2,875
Attention Deficit and Hyperactivity Disorder	<b>1.7%</b>	3.9%	N/A	603
Depression	<b>8.2%</b>	9.7%	7.5%	2,911
Insomnia	<b>3.2%</b>	3.7%	2.8%	1,136
Panic Attacks	<b>3.8%</b>	5%	4.6%	1,349
Substance Abuse or Addiction	<b>0.7%</b>	1.2%	N/A	248

These statistics are concerning given that depression and anxiety have been shown to be associated with academic impairment and are related to drop-out rates and lower GPA (Eisenberg, Golberstein & Hunt, 2009).

The National Survey of Student Engagement (NSSE) is conducted yearly to measure the level of student engagement and to track the impact of institutional initiatives that foster engagement at the University of Alberta. “Students perform better and are more satisfied at colleges that are committed to their success and cultivate positive working and social relations among different groups on campus.” (NSSE, 2011). The student engagement category is comprised on responses to the following statements:

- Campus environment provides the support you need to help you succeed academically
- Campus environment helps you cope with your non-academic responsibilities (work, family, etc.)
- Campus environment provides the support you need to thrive socially
- Quality of relationships with other students
- Quality of relationships with faculty members
- Quality of relationships with administrative personnel and offices

## The National Survey of Student Engagement

Agreement that the U of A is a Supportive Campus Environment

Degree Completion	2008	2011
Year One	52.6%	55.1%
Year Four	47.4%	51.3%

## The National College Health Assessment

	Affirmative response	Negative response
The University has a sincere interest in students’ health and wellbeing	61%	39%
Experience a sense of belonging to the U of A	66%	34%

The results demonstrate that the ongoing efforts and new initiatives taken to improve student supports and engagement have resulted in improvements in the campus culture. Taken together with the NCHA data, these surveys provide us with the evidence that enhancing student services and supports is critical to the student experience.

Whether students are at a crisis point or getting through the ups and downs of student life, the means and methods by which they access or receive information from the University can have a dramatic effect: on their wellbeing as well as their academic success. Students need to be able to find help when they need it and in many cases, before they need it. They need to be able to readily access the information and/or assistance required to take action to mitigate the situation in which they find themselves.

Some initiatives such as the soon to be launched Student Connect within the Registrar's Office are moving toward organizing and offering services as defined by the students' points of view and needs. For instance, current and future cohorts of students expect websites to be functional and mobile, to provide useful and up-to-date information, and to be relevant, engaging and accurate. They expect the U of A programs and services, whether online or face-to-face, to be effective, accessible and coordinated.

In order to be successful, effective communication with students requires an ongoing commitment that works in coordination with all aspects of health and wellness programs and services and continually adapts to the newest technologies and communication methods. While communication efforts need to be targeted to increasing mental health and wellness, they must also include the other programs and services that we offer including the physical, spiritual, academic and social.

## University Structure and Commitment

To be truly effective, post-secondary mental health initiatives require an ongoing commitment from the institution. This requires:

- a sustained focus on the impact of health and wellness on academic achievement
- identification of institution-wide priorities
- flexibility to address constituent needs as they evolve
- adequate resource allocations
- appropriate delivery models
- and active oversight of outcomes

Universities must adapt as evidence increasingly supports the impact of mental health and wellness upon retention rates, student engagement, learning and development, and ultimately academic success. Mental health and wellness initiatives must be championed at all levels of the institution, including senior administrators and the topmost echelon. A sustained initiative needs to be visible to faculty members, APOs, support staff, sessional, and contract workers as well as by undergraduate and graduate students. Student groups, the Students' Union and the Graduate Students Association have peer credibility that can create momentum for action that reaches out to all students on campus.

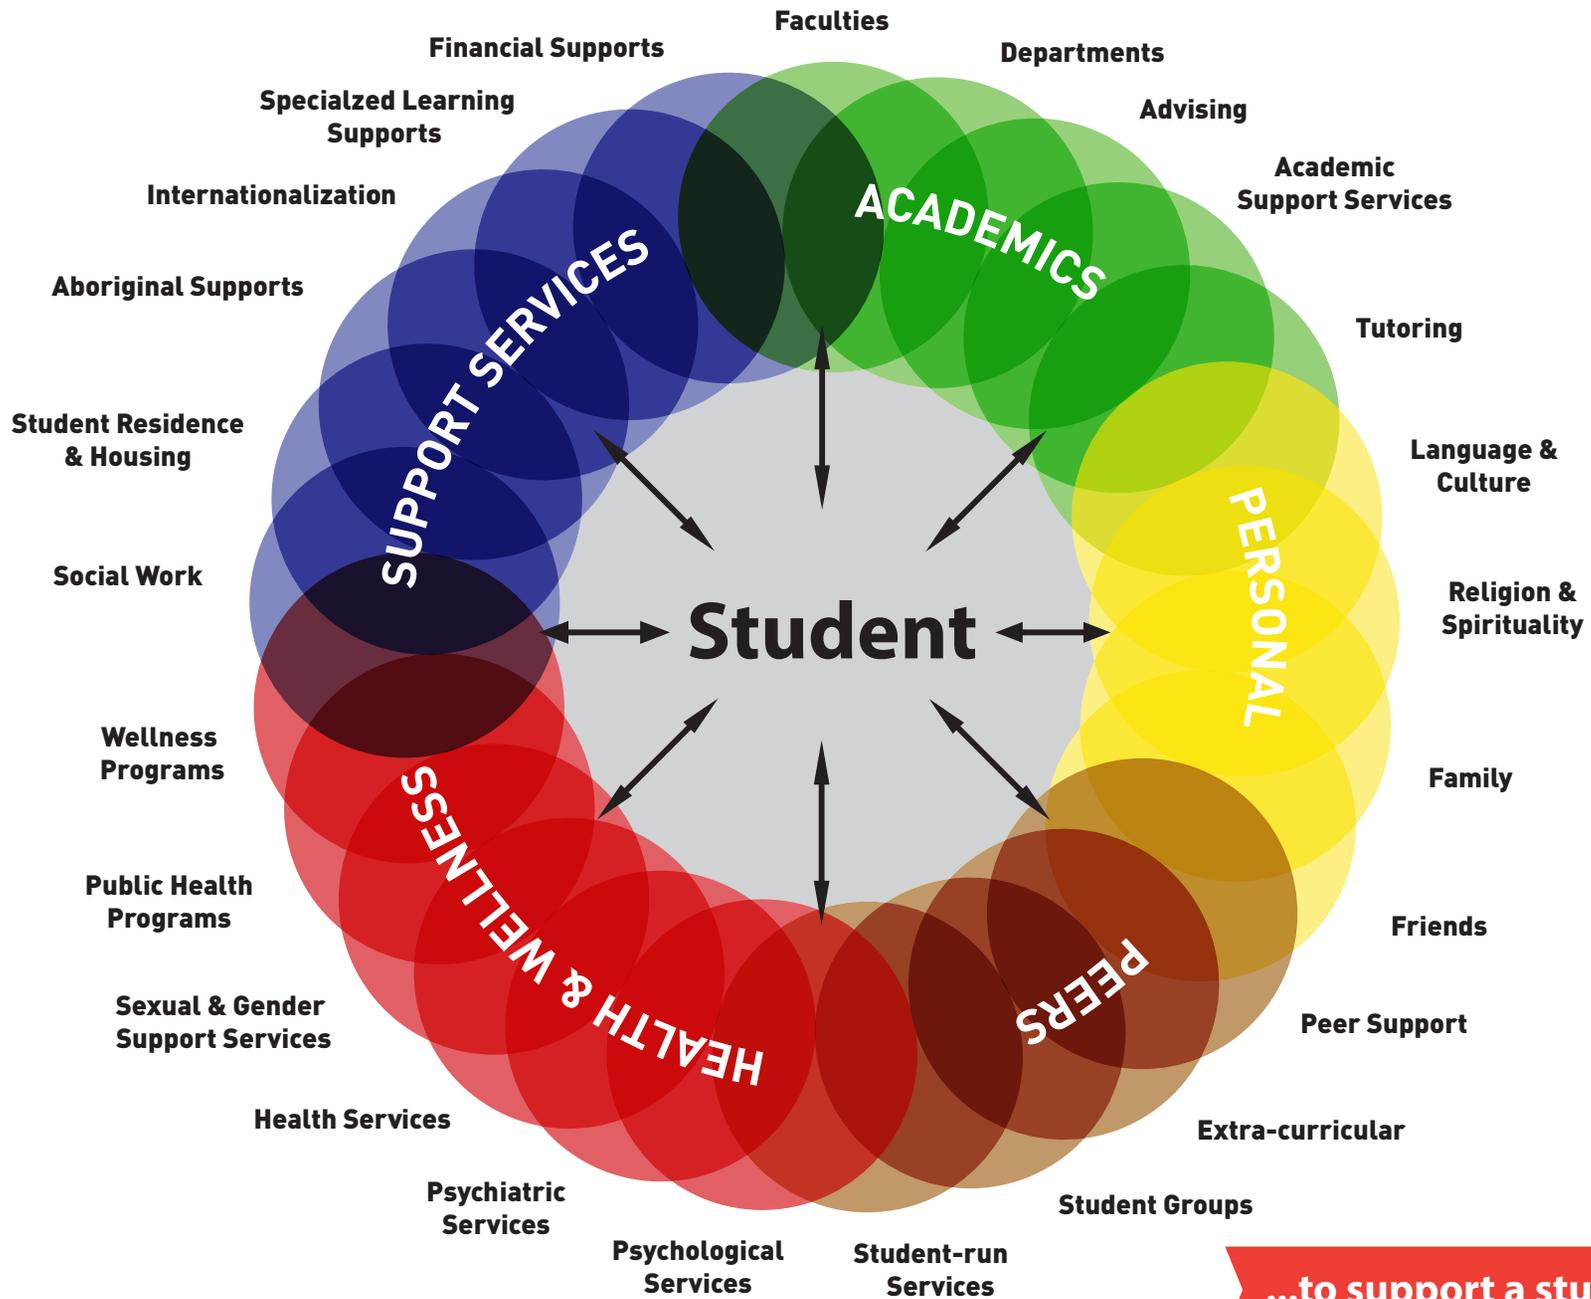

# THE WAY FORWARD

In 2003, the University of Alberta Senate Task Force on Wellness was created to make recommendations that would guide future initiatives to create a healthy and vibrant community. In 2005, the Senate Task Force on Student Engagement built upon the Wellness report and made specific recommendations to enhance the student experience and student connection with U of A campus communities. The U of A Comprehensive Institutional Plan (2012) reinforces the institutions commitment to ensuring that student experiences remain forefront in the institution's initiatives. The groundwork has been laid, and it's time to seize the opportunity and build the mentally healthy, well University that we want and need.

Progress has been made, and there are a lot of the right pieces of the puzzle in place. However, we need more, much more. The U of A's priority and commitment to student wellness must be made more visible, both within our institution and to community stakeholders. There are any number of negative impacts on post-secondary institutions that are unresponsive and inflexible to students' needs, or are seen to be, particularly in a time when public expectations regarding both mental health and universities are rapidly changing. Providing support services that enhance students' ability to be successful sends an important message in a competitive market; at no time has there been a greater need to maintain our appeal to prospective and current students.

While clinical, counselling, and other acute care services on campus are necessary, they alone are not sufficient. No one unit or service holds the key to ensuring students are mentally healthy and well. Demonstrating our commitment to a high quality student experience requires holistic planning and strategic management more than predominantly reactive responses to crisis. Creating a campus that supports mental health and wellness requires an institution-wide, community-based network of supports and services that has multiple points of entry for students. It also requires an environment that considers student wellness integrally in the design of policy, procedures, and decision-making on campus. It is not overstating to say that the success of all students at the U of A requires a renewed commitment to support students as they strive to meet their personal and academic goals.

**It takes a campus...**

**...to support a student.**

# THE U OF A LANDSCAPE: RESOURCE ALLOCATIONS

## Mental Health Centre

The Mental Health Centre (MHC) has adopted a new philosophy regarding how to provide effective and efficient services to students on the main campus. In 2010, psychiatrists that worked in the University Health Centre were amalgamated into the Mental Health Centre that had previously housed psychologists alone. Integration of the two professions into a single unit was intended to facilitate consultation, collaboration, and seamless service provision. A psychiatric nurse, hired in 2011, bridges the gap between psychological and psychiatric services by providing clinical support to students with psychiatric illnesses. A triage intake process is available four hours per day to assess students' levels of need and appropriate service requirements. In addition, the MHC is an important training site for graduate students pursuing advanced degrees in counselling psychology and clinical psychology. Doctoral interns are required to be enrolled in accredited programs.

### Resources as of December 31, 2012

The Mental Health Centre is located centrally on the main campus. The Centre is comprised of:

- 7 full-time psychologists
- 2.5 full-time contract psychologists
- 2 full-time psychology interns
- 3 full-time psychology interns (on 8 month contracts)

- 1 full-time psychiatric nurse
- 7 part-time psychiatrists (2.5 FTE)

## Community Social Work Team

In January, 2012, two social workers were housed within student services. One was affiliated with the Student Success Centre and the other was utilized as a resource for students who required intermittent support services as well as being responsible for the implementation of the Community Helpers initiative. There is less stigma associated with the social work profession than psychologists and psychiatrists, thereby making them more appealing to many students seeking help. In fact, most students who currently use the services of the social workers on campus are unaware of their professional designation.

In October, 2012, two additional social worker positions were created and all four positions were reorganized to create a single unit reporting directly to the Office of the Dean of Students. The role of the social work team was grounded in preventative action that supports resiliency and fosters a sense of connection to strengthen capacity, provide bridges to resources, and advocate for greater inclusivity on our campuses. The team's work is focused within the contexts of Community Education, Community Building, Community Outreach and Resources, and Community Advocacy. With the restructuring, their roles expanded across the U of A campuses.

The revised team mandate:

- Provides mental health training and workshops across campus
- Delivers the Community Helpers program

- Links students to university and community resources
- Provides informal services to students rather than rigidly scheduled, formalized services
- Collaborates with the Peer Support Centre to guide content and delivery of volunteer training programs.
- Ensures consistency of training year over year through the development of a comprehensive, mental health component for student volunteers
- Provides training to residence coordinators and residence assistants across campus
- Delivers workshops to faculty and staff about student mental health and intervention strategies
- Works closely with international students in the International Centre. Engaged social workers facilitate stronger relationships for students in difficulty who are unwilling to seek out or access formalized professional services.

### **Resources as of December 31, 2012**

- 4 community social workers (4.0 FTE)

## Institute of Sexual Minority Studies and Services (iSMSS)

The Institute of Sexual Minority Studies and Services was created in 2008 and absorbed other sexual and gender minority youth programs on the U of A campus. The institute provides a framework for a network of programs and services that support sexual-minority students. Through its work, students have access to specialized psychological support and advocacy including Sideright, a student residence support group and Inside/OUT. It provides numerous outreach educational programs across campus. Under its banner, research,

community service, and equity programs are offered. In the past year, a part time psychologist has been added to the compliment of employees to provide confidential services to students, faculty and staff. The Institute also spearheads the Safe Spaces initiative that, in combination with lectures and workshops, educates the campus community to create an inclusive campus climate. This places the U of A in an enviable position as a recent study found that only 30% of campus counselling websites mentioned individual counselling for sexual and gender minority students (Ontario Undergraduate Student Alliance, 2012). Even fewer (12%) had personnel trained to provide services to this specialized population.

### **Resources as of December 31, 2012**

- 1.0 FTE psychologist: provides services to the campus and City of Edmonton communities

## Aboriginal Student Services Centre (ASSC)

Aboriginal students require a unique set of supports to facilitate enhanced academic engagement and student experience. With the focus on ensuring that aboriginal students have access to appropriate services, it is increasingly important that tailored mental health services be available. The ASSC offers culturally appropriate student advising, social and emotional support services, access to community elders, study space, and social and cultural events that are inclusive to the campus community.

### **Resources as of December 31, 2012**

- A psychologist from the MHC provides service in the Centre three hours per week.

## Aboriginal Students Office

Augustana Campus has an Aboriginal Students Office that provides similar culturally appropriate services, academic advising and social events. They also offer an Aboriginal Student Mentor Program, pairing senior level aboriginal students with new incoming aboriginal students to assist with the adjustment to university life.

## Sexual Assault Centre

The Sexual Assault Centre (SAC) was the first free-standing independent institution-supported centre at a university in Canada. Other universities are using it as a model in the design of sexual assault centres at their own institutions. The SAC currently offers crisis intervention and short-term counselling to students, staff and faculty who have been impacted by sexual violence, harassment, and stalking. The SAC is active in innovative education and awareness programs across campus including Yoga for Healing, education workshops for classes or student groups, 'Don't Be That Guy' campaign, @You, a program for aboriginal students, safe house access, and informal community support workshops. They spearhead activities and information campaigns during the campus-wide Sexual Assault Awareness Week. The SAC delivers training workshops and seminars to student support units, student groups, as well as undergraduate classes across campus. Their student volunteers reach into the university community, deliver training sessions across campus to faculty and students, and provide support to those impacted by sexual violence.

### **Resources as of December 31, 2013**

- 1 counsellor (1.0 FTE)

## Faculty In-House Mental Health Support

Four faculties provide in-house student psychological services that extend beyond student advising services. The psychologists are well versed in the issues relevant to their specific student body and faculty programs, thus enabling them to tailor services.

### Campus St Jean

- .8 counsellor/psychologist counselling services in French and English (650 students)
- Psychiatric services in French available in the community

### Augustana Campus

- .8 FTE registered psychologists (1000 students)
- Psychiatric services are available in Camrose

### Medicine/Dentistry

- .4 FTE counselling services available in the Learner Advocacy and Wellness Department

### Faculty of Education

- 1.0 FTE registered psychologist provides services to undergraduate students

## Health and Wellness Team

The Health and Wellness Team (HaWT) supports student public health initiatives. The team oversees the Unwind Your Mind initiative implemented in the university's libraries during final examination periods and the Heroes for Health, a competitive student program that provides funding for outstanding student-initiated projects to foster wellness on campus. The team is also collaborating with the Students' Union and the Office of the Dean of Students in the Furry Friends pet-assisted therapy program. The HaWT team is responsible for the organization, distribution, and analysis of the bi-annual National College Health Association student survey.

# ADDITIONAL RESOURCE ALLOCATIONS IN 2013

## Mental Health Centre Restructure

Supplementary government funding has provided the opportunity to revise the delivery model for student mental health services. The MHC will be able to increase its ability to meet the needs of previously underserved students by offering more flexible hours, four additional locations and types of interactions with students and staff that reduce barriers inherent in our current service structure. In October, 2012, a proposal was presented to the Vice Provost Council that outlined a change in the MHC delivery model for the main campus. The recommendation was based upon the philosophy that the U of A needs to put services where the students are most apt to access them. The revised model includes satellite offices that are located in large faculties and units thereby expanding access of mental health services to multiple locations across campus. In addition to making the services more easily accessible and visible to the student body, placement within faculties or centres provides the opportunity to develop collaborative relationships between faculty members and service providers and to tailor services to specific student groups. The hours of operation would be extended to enhance access.

With additional resources, the following additions are underway:

### **Four new satellite offices are being created.**

- 3 satellite offices will be placed in faculties with large undergraduate populations
- 1 satellite office will be created for graduate student access

### **Additional mental health providers:**

- 4 full-time psychologists will be located in satellite offices
- 2 psychiatric nurses will conduct intake interviews throughout the day which will increase available counselling hours for psychologists
- Service hours in the Centre will be extended two evenings per week

With the acquisition of the Government of Alberta \$3,000,000 grant announced in January, 2013, new psychologists will be hired to work in the satellite offices that will be located in the three largest faculties on campus: Arts, Science, and Engineering. The fourth largest faculty, Education, has had a full-time on-site psychologist since 1996. The Graduate Student Association has indicated the need for services tailored to graduate students who comprise approximately 19% of the clientele currently served at the MHC. To accommodate this need, a fourth satellite office will be placed in Triffo Hall.

## Community Social Work Team

With additional resources, the following additions to services are underway:

### **Additional mental health providers:**

- 1 clinical social worker (.4 FTE)

Aboriginal students have been identified as a group in need of additional mental health support therefore clinical social worker services will be extended into the ASSC on a part-time basis. International students have also been identified as a group in need and the appropriate services are currently being evaluated.

## Sexual Assault Centre

With additional resources, the following additions to services are underway:

### **Additional mental health provider:**

- 1 psychologist (.75 FTE)

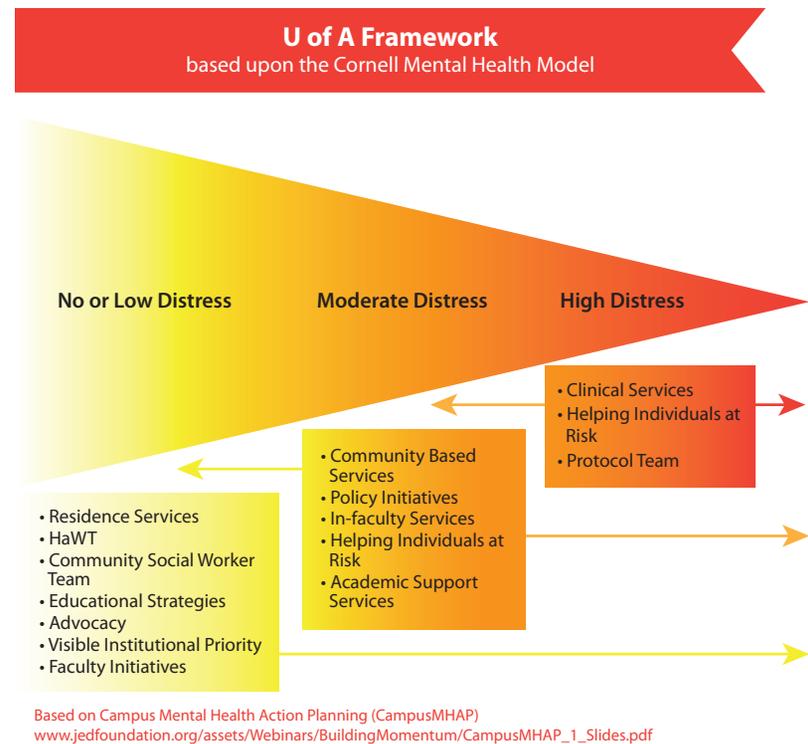

Government funding has provided the financial resources to hire a part-time psychologist for a three year period, beginning September, 2013. The current counselling program will be revised to include ongoing individual counselling and group counselling.

# THE MODEL

A model developed by Cornell University provides a useful framework for developing and implementing student services and information delivery that includes engagement at all levels of the campus community. Historically, student mental health and wellness services have been approached from the perspective of providing mental health interventions by clinicians and medical facilities and have functioned within silos (Eisenberg, Golberstein, & Hunt, 2009). Operating parallel or uncoordinated services lacks efficiency, risks duplication of resource allocations, and impedes the delivery of impactful programs and services. With a health-promoting approach, the totality of students will be impacted by an emphasis on promoting, maintaining or regaining their mental health. Creating an environment that is intentionally designed with a breadth of services and avenues of access “foster[s], support[s] and sustain[s] a campus culture in which students’ growth, resiliency and learning are fostered.” (p. 9, Silverman, Underhile & Keeling, 2008).

The right side of the triangle represents those students who require direct clinical support services from doctors, psychologists, psychiatrists, and psychiatric nurses in the Mental Health Centre, community social workers and existing in-faculty psychological services. These are the students that are forefront in people’s minds when conversing about student mental health occur.

The middle segment of the triangle encompasses access to services by students who require a variety of non-clinical supports to facili-

tate their academic success. It focuses upon providing targeted interventions for non-traditional and academically struggling students on campus and enhancing the ability to access the breadth of student support services. Non-traditional groups include First Nations, Metis and Inuit students, second career students, international students, and gay-lesbian-bisexual-transgender students, while more-at-risk groups include first year and transfer students. At the U of A, the existing Helping Individuals at Risk (HIAR) program can be extended to identify students with declining mental health and/or academic difficulties in order to facilitate early intervention and access to support

resources. Developing institutional awareness of the link between student mental health and learning and academic success could be facilitated by designing workshops that provide faculty, staff, and administrators with awareness training to assist them in identifying and responding to distressed students. Awareness of the available support services on campus needs to be enhanced. A focus upon mental health and wellness issues during student orientations could be incorporated in such a way as to encourage resilience and adaptation to the U of A.

The left side of the model focuses on the quality of the culture and learning climate of the institution, and the level of student engagement. Given that the U of A is committed to the development of citizenship, its institutional commitment to personal growth and development as well as academic success should be visible to the campus community and community at large. While the following statements by the Senate Task Force for Student Engagement are framed within that context, the power of feeling valued and belonging is critical to fostering and maintaining student health and wellness.

*There can be an extraordinary value in a single positive encounter with another person in such a large and diverse campus community. Feedback from focus groups suggests that front line campus personnel play a central role in ensuring that students are not only informed, they are also valued as contributing members of the campus community. ...*

*Each encounter with a student is an opportunity to promote and support student engagement in social and academic campus life. Students who want to get involved and search for resources are also in the process of defining their role in the university community.*

*Students are not just seeking information - they are also seeking a sense of place and a sense of belonging." (2005, p. 43)*

As institutional policies and procedures are developed, their impacts upon mental health and wellness cannot be discounted. Importantly, peer-to-peer support has been shown to be highly effective for assisting students with overcoming personal challenges and therefore plays a crucial role in fostering a healthy and supportive campus.

Given the insight and usefulness of the model in both range and scope, the recommendations that follow in later in this report have been developed based upon the Cornell framework.

# RECOMMENDATIONS

## MAKE OUR COMMITMENT VISIBLE

1. Student mental health issues must be a visible priority of the University of Alberta

*"...the university supports the development of the whole student and dedicates resources to both academic and student life development." (University of Alberta, Comprehensive Institutional Plan, 2011, p. 40)*

Creating a University that supports, nurtures, and promotes student mental health and wellness requires a pledge that the institution is mindful of mental health and wellness in policy, procedure, practice, and all levels of decision-making. An explicit statement in the U of A strategic plan affirming that mental health and wellness impacts academic achievement, retention, and success is required to send a strong message to both internal and external communities. It will provide the foundation for a sustained commitment to student mental health services and wellness programs, and reaffirm the importance of ongoing campus initiatives and administrative support to student success.

2. Ensure that the U of A community recognizes the importance of student mental health on learning, academic success, academic persistence and program completion

Senior level advocacy is essential to maintain a focus on the impact

of student mental health on learning, academic achievement, retention, and success. Mental health and wellness are foundational to students' abilities to reach their full potential and achieve their aspirations. Acknowledging that mental health impacts the student experience, academic success and community engagement must be at the forefront of a comprehensive approach that includes enhancing awareness, education, and training for faculty and staff, offering sustained support programs, and developing supportive policies and procedures.

3. Review policies and procedures to ensure they are consistent with mental health initiative

The Academic Policy and Process Review (APPR) Task Force has a mandate to review current policy. "The mandate of the Academic Policy and Process Review (APPR) Task Force is to facilitate students' learning by ensuring that the University's academic policies and processes for academic programs do not present unnecessary barriers to student engagement and do not prevent students from having positive and rewarding experiences at the University of Alberta." [www.provost.ualberta.ca/en/CommitteesandTaskForces/APPR.aspx](http://www.provost.ualberta.ca/en/CommitteesandTaskForces/APPR.aspx)

Their mandate should be expanded to ensure that policies and procedures are consistent with fostering and maintaining student mental health and wellness by reducing bureaucracy and institutional impediments

4. Encourage faculties, non-teaching, and student service units to review their policies and procedures to ensure that they align with the larger institutional initiatives

The effects of programs, policies, and procedures on students must

be a fundamental consideration for all academic and non-academic units. Including a health and wellness ‘lens’ should be encouraged in the development of programs, policies, and procedures that are more student-friendly and student-centred. By seeking better alignment between institutional and faculty policies and procedures, the U of A can remove unintended barriers that impede the ability of students to navigate the bureaucracy of this large institution.

#### 5. Reconsider student services across the University from the students’ point of view.

The contemporary challenge for delivering student services is to recognize and accommodate both the particular and the general, the individual and the common aspects of our students. At the University of Alberta, we want to create a space for learning and inquiry that allows our students to feel comfortable in being themselves as well as identifying as a U of A student. In striving for this balance, we will at once improve the quality of the university experience for our students while harnessing the full benefit of diversity in our community.

Our programs and services need to be delivered in a coordinated and consistent fashion, but that is not incompatible with a truly heterogeneous, diverse student community. When one becomes a U of A student, their individual background comes with them and enriches the U of A community, and the community needs to respond with its programs and services that are no more or less than are offered to a student coming from any other background.

The sense of care and interest that the institution shows in its students needs to come through to students as individuals, who share in common the experience of being students. We need to be respectful of their backgrounds (cultural, language, religion, gender, ethnicity,

etc), and strive to be relevant and engaged in *their* transformative experience—in who they are now and who they want to be after their time at the U of A.

This is not just about administrative and bureaucratic efficiency and effectiveness; this is about the best way to approach the organization and delivery of programs and services to students.

## EXPAND WELLNESS INITIATIVES AND RAISE THEIR PROFILE

#### 6. Rename the Mental Health Centre

The name “Mental Health Centre” has been identified by students, support staff, and faculty as creating a barrier for many who require counselling services but are reluctant to seek services there because of the stigma associated with the term ‘mental illness’. While the name was intended to represent the spectrum of services provided in the Centre, it creates an unintended barrier for many students seeking services. The name of the Centre should change to Counselling and Clinical Services, which will accurately reflect the psychological and psychiatric services that are being provided, but reduce the stigma associated with the current name.

#### 7. Develop and deliver addictions and substance abuse student services and support groups on campus

Addictions and substance abuse services are considered to be crucial student services and are becoming standard on many North American campuses. It is strongly recommended that a comprehen-

sive addictions and substance abuse program that includes ongoing education campaigns, student support, and direct student services be developed for implementation by the 2013/2014 academic year. This initiative could build upon existing resources, such as the online “Check Yourself” resource.

## 8. Promote health and wellness for all students

Despite the tendency to focus upon acute care and student crisis, we need to focus upon promoting mental health and wellbeing for all students on campus. In order to be truly proactive and comprehensive, mental health and wellness strategies need to encompass all aspects of campus life to facilitate enabling and nurturing communities that support student wellness. Ensuring that mental health and wellness stays at the forefront of institutional decisions and policies will help to create a culture of care, while continuing to demonstrate to students that their welfare is important to the institution.

## 9. Student groups should be encouraged and provided with support mechanisms by the university.

A rich diversity of student groups is a strength the U of A enjoys, but we are not making full or best use of this strength; we need to try to find better ways of activating and extending the many benefits that come from a dynamic and participatory student population. In essence, this is about student driven student engagement; we need to look for these ways to engage students with our large, comprehensive campus, whether they commute or live in residence, come from elsewhere in Alberta, Canada, or around the world. The trust and connection that students make with their peers is often crucial to a student’s individual wellbeing and sense of community.

## 10. Promote peer-to-peer mentoring and support services

Beyond the immediate impact to individuals, the full value of peer-to-peer interactions lies in the development of community across the student body. Many students identify turning to peers for advice, support and assistance as their preferred choice, as it provides multiple avenues for trusted and trustworthy engagement without the stigma of seeking professional services. Peer support and student-to-student engagement opportunities should be enhanced by:

- promoting and expanding the Peer Support Centre;
- engaging senior level students to become ambassadors for student mental health and wellness;
- compiling a student-to-student guide about “Everything you need to know about adjusting to the challenges of being at the U”, including one that is graduate-student specific;
- encouraging student-driven health and wellness groups to work more collaboratively across the university so that mental health and wellness campaigns are more impactful for a broader student audience;
- developing a network for collaboration between mental health clubs on campuses; developing graduate student specific “What I wish I knew about grad school”; and
- facilitating the development of campaigns designed for targeted student populations (mature students, transfer students, international students, aboriginal students, rural students).

Unfortunately, institutional structures are too often impeding student group collaboration; the development of cohesive programs should be considered to determine whether procedures could be modified and streamlined to improve effectiveness. There are also potential connections with Recommendation #9.

### 11. Expand Health and Wellness Team (HaWT) involvement in student health initiatives

By virtue of its role to oversee all-things-students, the Office of the Dean of Students (DoS) houses expertise and maintains connections throughout the university community that can augment health promotion initiatives. The Health and Wellness Team, housed within University Wellness Services, plays an important role in facilitating student-lead public health initiatives on campus. To achieve the goal of developing strong collaborative relationships, the HaWT and DoS should ensure that a close working relationship is developed that will enhance campus-wide initiatives. Team leaders have the expertise to design campus-wide student health promotion campaigns and the leadership ability to expand their involvement in student-lead mental health programming. It is important that the HaWT team work in close collaboration with the DoS communications office to maximize campus awareness of mental health initiatives. Eliminating organizational barriers that interfere with cohesive, seamless, and broad-based implementation strategies is essential.

## ALLOCATE DEDICATED RESOURCES

### 12. Align an increase in required physical space with the increased demand for services

Despite the growing numbers of students on campus and the increasing demand for services provided by mental health and wellness units, restricted space precludes the ability of some units to provide accessible and timely services. It is strongly recommended that adequate space be provided to allow support units to fulfill the ever-increasing demand for services. It is incumbent upon Facilities

and Operations to work collaboratively with the Office of the Dean of Students to ensure that space availability does not restrict the U of A's ability to provide mental health and support services that are in alignment with the U of A mandate.

### 13. Ensure sustainable funding

The U of A has already committed to providing access to mental health and wellness services for students. As stated in the Comprehensive Institutional Plan, the University will "provide foundational support structures for students in order to create a nurturing environment that allows for positive student experience and engagement." (Access Goal 14, p.40) With an increasing focus upon the importance of mental health on learning, student success, academic achievement, and retention, post-secondary institutions are being charged with an additional mandate to provide adequate access to supports. Adequate student services require stable, predictable funding envelopes to develop strategic plans to address the need. Cohesive, comprehensive, and integrated services require short-term and long-term strategic planning.

### 14. Allocate necessary resources to support the growing demand for support services

As the student population at the U of A increases, the demand for services will assuredly grow. The concern about student mental health has grown exponentially in post-secondary institutions over the past decade. A new commitment to providing mental health and wellness services has resulted in the development of a number of comprehensive and strategic documents intended to guide long range plans. Initiatives are designed upon services already in place, the size and nature of the institution and access to sustainable funding. The U of

A has a solid foundation upon which to continue to advance its student mental health initiatives, thus ensuring that they are accessible and effective. All student services, including the ASSC, MHC, SAC, Student Success Centre (SSC), and Specialized Support and Disability Services (SSDS), contribute significantly to providing mental health support to students, both graduate and undergraduate.

15. Office of Advancement should engage in fundraising initiatives that support student mental health and wellness services

Fund-raising campaigns to enhance student services and mental health supports are strongly recommended. There are few individuals in society that have not been directly impacted by a loved one or acquaintance struggling with mental health issues. Student mental health has been brought to increased public attention through the media. In the context of the reality of tight budgets and competing realities, the University needs to commit to a directed and high profile fundraising effort to provide financial support that will help build and sustain student health and wellbeing services. It is important to communicate the value that the U of A places upon providing mental health services as it focuses upon supporting students, facilitating success, and fulfilling its commitment to enhancing the learning experience for all students.

## MOVE TOWARDS COHESIVE MENTAL HEALTH & WELLNESS PROGRAMMING

16. Reduce the fragmentation and “siloeing” of student mental health services

The creation of a Student Mental Health Coalition comprised of mental health service providers housed across the U of A campuses would facilitate strong working relationships between faculties and service units. It is strongly recommended that a committee be struck that comprises representatives of Campus St. Jean, Augustana, Mental Health Centre, community social workers, as well as faculty-based and institute-based psychologists and counsellors. Regularly scheduled meetings would facilitate campus wide collaborative initiatives and best practices across units. As the structures for providing mental health and wellness services change to become more infused into faculties, stronger relationships between diverse providers will ensure continuity and cohesiveness between services.

17. Recognize the roles that the Specialized Support and Disability Services (SSDS) and the Student Success Centre (SSC) have in addressing student mental health issues

SDSS and SSC have observed an increased number of students requesting accommodations because of mental health concerns. Less psychologically robust students often turn to academic services rather than mental health or wellness services for support. In addition, a large percentage of students who initially present with physical disabilities or learning disabilities are also compromised by secondary mental health challenges. Complex cases involving multiple disabilities require increased resource allocation to facilitate academic

success and student wellbeing. In addition, accommodations and adherence to the university's commitment to provide learning supports to all students needs to be consistently applied across all faculties.

### 18. Enhance the profile of the chaplains and acknowledge the value of spiritual support

Spiritual and faith based guidance is valued by many students and staff on campus. Chaplains and religious leaders have contributed their services and support to the U of A community for many years; however, their contributions to student health and wellness could be made more visible. Despite having the capacity and mandate to provide counselling and spiritual guidance, they are, for the most part, an untapped resource. Chaplain services should become a standard referral to students by mental health providers, student support personnel and student advisors. The partnership between the Chaplain's Office and the University should be officially recognized with established roles, responsibilities and mandate to acknowledge their value on campus.

### 19. Dedicated prayer and meeting spaces should be made available to the campus community

As the diversity of the campus community increases so does the need for space to accommodate the needs of students and staff who practice their faith. International students, in particular, have expressed concern about the lack of dedicated prayer spaces (iGrad survey, 2011) at the U of A. A dedicated prayer space on campus would not be restricted to any one faith, nor would it be restricted to student use alone. By providing spaces for prayer and spiritual events the university will acknowledge the multiple needs of its' members, providing resources that support its campaigns for an ever-increasing diversi-

fied population, as well as recognizing the value of spiritual health in mental health and wellbeing.

### 20. Profile wellness programs across campus

Physical wellness programs are offered through the Faculty of Physical Education and Recreation and a multitude of student groups. As part of a coherent health and wellness initiative, it would be beneficial to highlight the importance of physical health, sleep, eating patterns, the impact of stress, mind breaks, and drug and alcohol use. The Heroes for Health program, sponsored under the auspices of the Health and Wellness Team (HaWT) also organizes the Unwind Your Mind initiative that could be expanded beyond examination periods. Raising the profile of the breadth of healthful opportunities provides multiple points of access to health promotion activities on campus. Collaboration between faculties and the HaWT would be assist in advancing mental health initiatives.

## ENGAGE OUR COMMUNITY

### 21. Provide regularly updated comprehensive information about student services to all faculty and staff

The structures and roles of student service units across campus as well as in the Office of the Dean of Students have undergone significant re-alignment and name changes in the past two years. Lack of updated information hinders faculty and staff referrals of students to appropriate services. The dissemination of updated information should be provided to faculties, departments, support staff and student organizations for broader distribution. Regular updates of stu-

dent services and presenting institutional initiatives being addressed will keep student mental health and wellness issues in the limelight.

## 22. Develop orientation and refresher sessions for faculty, APOs, and staff that focus on the student landscape

It is important that faculty, APOs, and staff understand the changing expectations of the student body. Faculty and/or APO orientations should be designed to focus extensively on the student experience and the university's commitment to creating a supportive environment. At minimum the content should include information on the Helping Individuals at Risk program, the role of the Office of the Dean of Students, student support services and resources, procedures for referrals, and University policy for accommodations. A rotational schedule of orientations and education sessions should be available throughout the year through a variety of avenues including online information, face to face seminars, social media, etc., to facilitate ready access of updated information.

## 23. Increase and improve online resources for faculty and staff

As the internet and social media has become a common first point of access to information, we need to ensure that we are providing high-quality online resources related to health education and health promotion that educates faculty, staff, and even parents. Online education programs designed for faculty, APOs and staff have been introduced on campuses across North America. They include basic information regarding mental health and wellness, common disorders in emerging adulthood, suicide, appropriate interventions, listings of university supports and services and the impact of mental health problems upon academic success.

## 24. Adopt a modified Mental Health First Aid program

The U of A takes pride in the success of the Mental Health First Aid (MHFA) program on campus. While many faculty and staff have completed the training, the necessary time commitment precludes a large number of employees from participating in the program. It is strongly recommended that a revised MHFA program be made available to campus community members. A commitment by senior administration to encourage faculty and staff to participate in mental health education through on-line and workshop training opportunities would demonstrate the University of Alberta's pledge to student wellness. A recommendation to modify the program was made by the Senate Task Force on Wellness in 2003.

Several universities have found that the MHFA training program is not suitable for an institutional setting and have turned to creating their own modified versions. The University of Guelph has developed shorter modular versions that range from a one hour sessions for faculty that focus on warning signs and how to refer appropriately to campus services, to a full day training for residence assistants, peer helpers and front-line staff in the registrar's office. The Council of Ontario Universities, in conjunction with the University of Toronto, York University and Guelph, is developing an online training program for faculty that, with permission, could be used by any university.

## 25. All faculty and staff should participate in revised Mental Health First Aid (MHFA) training

In alignment with the University's commitment to attending to student mental health and wellness, personnel at every level of the community, from senior administrators and faculty members, to

APOs, to ongoing sessional instructors and contract staff, to support staff should be expected to participate in revised awareness training. Educating incoming deans, associate deans, chairs and APOs could be delivered through online modules or in face-to-face orientation sessions. This is the most direct way to highlight changing characteristics and demographics of students and ensuring that mental health initiatives are visible, valued, and sustained.

#### 26. Provide resource information and handbooks for parents, students, and staff

Comprehensive parent, student, and staff handbooks have been developed at major North American institutions. In the spirit of sharing best practice documents and programs, permission will be granted to sister institutions to adapt these materials for their use. While each handbook would require modification to reflect the University of Alberta reality, it would be useful to investigate, and amalgamate these resources to provide comprehensive need-to-know information. In particular, the availability of a faculty-specific resource handbook for parents is becoming common practice as parental involvement and parental support is recognized as beneficial to first year students and students transferring between institutions.

#### 27. Develop resources for sessional instructors

Sessional instructors and contract staff are actively engaged with incoming undergraduate students; however, they are overlooked as important gatekeepers of student mental health. Resources should be made available to sessional instructors and contract staff to update them on signs of behavioral or academic distress, intervention procedures, university resources, and mechanisms for referring students to available supports. Those sessionals and contract staff with

regular involvement would benefit from participating in education sessions and mental health awareness training with faculty, APOs, and staff.

## ENHANCE STUDENT-CENTRED COMMUNICATIONS STRATEGIES

#### 28. Fundamentally reconsider the way student services are marketed and communicated at the U of A from a student's point of view

If there is one thing that we should change about the current situation, it is the way we communicate with our students. There needs to be a concerted and coordinated effort at improving the way we communicate with current students, both undergraduate and graduate. Students need to be at the centre of our communication processes, and we need to consider all student services as contributing to the mental health and wellbeing of our students, regardless of who they are and where they find themselves on the spectrum of mental health and wellness. Perhaps the most obvious example of this need for improvement can be found in the University's online space, particularly in the 'current students' or 'student life' areas.

#### 29. Renovate the online space for current students at the U of A

Students (and others) expect our online platform to be a dynamic and reliable source of information, venue of discourse, and functional tool for being a student in the 21st century. However, the online space ostensibly aimed at current students is currently underwhelming despite having the potential for being our most important tool of awareness, dialogue, and outreach. Even when focussing directly on health

and wellness services, information, activities, and programs are often promoted within the organizational frame of reference, and not from the point of view of a student.

Students should not need to understand the organizational structure in order to get reliable information and access programs and services. Students need to be at the centre of our communication processes, and the online renovation should be a first priority at the outset. Redundancies and duplications can be reduced; information about programs and services that are relevant and useful to students should be clarified and organized, made more engaging, student-focused, and more easily findable.

### 30. Implement a university-wide approach to increasing awareness of student services

Both graduate and undergraduate students commonly report that they are unaware of many aspects of the university's support services, particularly in the first two years of their programs and other transitional stages during a post-secondary education. However, there are a lot of valuable and effective student programs and services already in place and operating at the U of A. The Office of the Dean of Students should be charged with coordinating a comprehensive awareness strategy with up-to-date, and need-to-know information for all students. Faculties and departments should be consulted to assist in developing information and strategies to best communicate with specific student groups.

All tools, channels, and platforms should be considered, including: the creative and active use of social media; more comprehensive and current information on University websites, including the homepages, with a particular focus on improving the findability of information

and accessibility of services; engaging various methods of delivering information electronically; and, developing university/student association partnerships. Other ideas raised included power point slides prior to the beginning of classes in large lecture halls or including student services information on course syllabi.

### 31. Conduct a University-wide communications campaign emphasizing mental health

This campaign needs to be coordinated and collaborative across campuses, and founded firmly on public and mental health and wellness principles. It should aim to de-stigmatize mental illness while also building awareness and educating our campus communities about mental health and wellness from a 360 degree perspective. It would also support, directly and indirectly, the work of the various parts of our institution that are dealing with mental health and wellness issues on a day-to-day basis.

## **CREATE INSTITUTION-WIDE INFRASTRUCTURE**

### 32. Create a University Health and Wellness Committee (UHWC)

Comprised of senior administrators, faculty, APO, staff and student representatives this committee will be responsible for the development of a comprehensive framework that is consistent across all U of A campuses, harnessing resources, and shepherding mental health and wellness programs forward. It would also be tasked with ensuring that modifications to the framework accommodate changing stu-

dents needs. This high level committee will sustain the University's commitment to mental health and wellness issues. Once priorities are identified, sub-committees or task forces would be created to identify the scope of an identified issue, develop a strategic plan, pinpoint resource requirements, and submit recommendations to the UHWC. The committee will report yearly to the provost, Board of Governors and University Senate on initiatives and indicators of success.

### 33. Create a Student Health Advisory Committee

Reporting to the Health and Wellness Committee, the Student Health Advisory Committee membership would represent all levels of the institutional structure to ensure adequate representation and diverse perspectives including the Dean of Students office, Registrar's office, Physical Education and Recreation representatives, senior academic administrators, chaplains, UWell, psychologists housed within faculties, student advisors, and student representatives. It would be tasked to identify arising issues of concern, monitoring the need for adaptations to student services, ensuring that supports are appropriate for diverse populations, designing mental health programming, and making recommendations to the UHWC for new initiatives. The committee would also work in conjunction with communications officers to design updated social media outreach for students. Members of a newly constituted Healthy Campus Working Group could potentially provide the foundation for an expanded Student Health Advisory Committee.

### 34. Develop a Crisis Counselling Team

Under the auspices of the Crisis Management Team Action Plan, a Crisis Counselling Plan has been developed by Risk Management to

coordinate the delivery of student mental health services in the case of an emergency. A Crisis Counselling Team (CCT) will be created. Answering to the Operations Section Chief, the CCT would be tasked with determining the appropriate counselling and support services necessary for affected students in an emergency situation as well as tasked with developing post-crisis protocols for providing ongoing assistance to affected students.

### 35. Create an outreach protocol to students directly impacted by a crisis

Once an imminent crisis has past, ongoing support services should be available to students who have been directly impacted. Processes to facilitate access to services should be designed to include all mental health service providers on campus, regardless of their position or assignment. In addition, a standard procedure and communication plan for making students aware of the availability of service without needing to go through the routine screening process needs to be developed.

### 36. The Helping Individuals at Risk (HIAR) policy and program should be augmented to include a more comprehensive early intervention program

The HIAR policy is designed as a 'connect the dots' program to identify behavioural concerns of individuals at risk of harming themselves and others and to refer them to appropriate services on and off campus. Increasingly, institutions are utilizing alert programs that include both behavioural and academic at-risk behaviours. The identification of academic concerns, in addition to the current focus on behavioural issues, extends our program and policy and will allow us to identify students at risk of academic failure who are struggling

so that we can connect them with the appropriate university or community resources to mitigate their issues. The addition of a software program will make the process of identifying individuals of concern more streamlined, transparent, comprehensive and manageable. In addition, a case management team will be created that evaluates complex cases to ensure that individualized and appropriate interventions are provided to the student. (See revised structural graphic in Appendix A)

### 37. HIAR training must be provided in a systematic way to the university community

It is important that a schedule be developed to provide workshops and training for the newly revised HIAR platform. Education workshops for all faculty, staff and instructors must be regularly available and training sessions should be delivered through department councils, faculty councils, graduate teaching assistant training sessions, and community workshops. The role and processes of the extended HIAR software program should be an issue worthy of focus at chairs school, deans school, and faculty and staff orientations.

### 38. Consider Implementing a voluntary/involuntary leave policy, developed by members of the HIAR and Article 91 Protocol Teams

An involuntary leave policy is a comprehensive safety net that would be used only in those cases in which a student presents a potential harm to him/herself or others and/or is so incapacitated as to be unable to function within a community. "Determining whether involuntary leave is in the best interests of the student [is based upon] balancing his/her desire to stay in school with what services and support your college is able to provide" (The Jed Foundation, 2006, p. 3). The

benefit of an involuntary leave program is that it allows the university to make decisions that address the safety and security of all students when a student who is in need of extensive mental health services refuses them or the illness prevents her/him from continuing in a program of studies.

The voluntary/involuntary leave policy should be developed by a strategically selected subgroup drawn largely from the HIAR and Article 91 Protocol teams. This team would be responsible for developing transparent criteria for leave that can be triggered by the student or the institution; determining protocols for return to the institution; and, developing the specific criteria for a re-admission committee. The policy and procedure would include a standardized non-punitive re-admission and re-entry protocol that allows for the return to the university when the student's health is stabilized. Evaluation on a case-by-case basis would be considered by a committee comprised of the Dean of Students or representative, leader of the Mental Health Centre, and a faculty member.

### 39. Encourage the Graduate Student Association (GSA) to complete a cost/benefit analysis of the supplementary counselling contract.

The GSA has a health benefits contract with Homewood Human Solutions to provide supplementary wellness, financial, legal, and medical services. Graduate students interviewed in focus groups and individually consistently reported that they were generally unaware of the availability of these services. It is strongly recommended that the Supplemental Health and Dental Plan be made more visible to students as well as a cost/benefit analysis completed to ensure that graduate students are receiving value for their participation in this program. [www.ihaveaplan.ca](http://www.ihaveaplan.ca)

#### 40. Evaluate programming effectiveness and impact regularly

To provide evidence of the impact of service delivery modifications and to guide program and future initiatives, student surveys should be conducted regularly. It is recommended that NCHA, Healthy Minds, and NSSE scores be utilized to guide institutional decisions about student mental health services and innovative approaches to providing on-going student supports. Faculty, staff, APO and student focus groups would be beneficial in augmenting survey results.

### REVIEW AND ENHANCE ORIENTATION

#### 41. Orientations should be re-designed to adequately orient students to our complex institution.

In conjunction with the Dean of Student's Office, the Students' Union has been working to incorporate changes into first-year student orientations. Residence Services has re-designed their orientation for first year students by developing a one-week 'Basecamp', a first-year curriculum program. While this is an important addition to the cadre of U of A orientations, all relevant information and guidance cannot be provided to students acclimatizing to post-secondary demands in a short time period. In addition, 'Basecamp' is only available to students moving into first-year residences.

The Senate Task Force on Student Engagement (2005) recommended that orientations for first year students be extended "to include small group sessions throughout the first term" (p. 45). That recommendation was based upon feedback from students that re-engaging with others in the same orientation group would foster social support networks and build relationships that would assist with the transition

into the academy. In 2012, students reported having difficulty differentiating relevant and critical orientation information that would be helpful on a personal level, from general information. They also reported that it was common to feel higher levels of being overwhelmed and anxious following orientation rather than confident and informed as they began to embark on their university studies. This is counter to the purpose of orientation as a vehicle to ease the transition to the U of A.

#### 42. Design orientations for students transitioning from other institutions

Increasingly, the U of A accepts students who are transferring from smaller post-secondary institutions; however, they are not provided the level of support that first year students receive, or do not avail themselves of the orientation services offered to them. While they may have adapted to their previously attended institution, the transition to the U of A can be difficult because of the differences in size, culture, and academic expectations. To facilitate student engagement and a successful transition to the U of A, further attention should be directed to orientations designed to address transitioning students' needs would be beneficial.

#### 43. Design culturally meaningful orientations

During focus group conversations, international students provided insights into how orientations should be strengthened to address the needs of specific cultural groups. They indicated a willingness to help design and participate in culturally meaningful orientations that would provide insights into Canadian culture and academic standards by 'adding the personal touch'. While it is unrealistic to expect that every cultural group requires its own orientation, this proposal

should be considered for groups that have significant numbers on campus. Students returning to the U of A should be consulted to ensure that the delivery of orientation information is best designed to be meaningful and beneficial to specific cultural groups. Graduate students indicated an interest in facilitating orientations and being involved, even to the extent of attending to provide minimal translation if required.

#### 44. Coordinate schedules and examine content of student orientations delivered across campus

Faculty, department and university orientations, many of which have required attendance, are frequently scheduled simultaneously, placing students in a difficult situation. Further, orientations provided by different sources tend to reiterate similar information. Rarely do they include insights into the personal demands of academic studies, managing stress and time management, or adapting to life in Canada which is information students indicated would prepare them for the diverse, and often competing, demands of being successful in their academic pursuits. These results are consistent with those reported by the U of A Senate Task Force on Student Engagement (2005). A priority should be placed upon scrutinizing the content, scheduling, and delivery of orientations for all students.

#### 45. Make orientation information accessible throughout the year

Both undergraduate and graduate students expressed the need to find avenues for social support, to learn how to become involved in a meaningful way, and to access resources should they be needed. They looked to the orientation to provide this information. A commonly reported observation was the inability to differentiate between important versus unimportant information until the information was

needed. Students suggested that orientation content be delivered through multiple methods that would be accessible to them throughout the year, including online.

## SERVE THE NEEDS OF INTERNATIONAL STUDENTS

#### 46. Integrate international services within the larger university community

International students are expected to navigate between two somewhat-connected, somewhat-distinct, somewhat-similar streams of programs and services. To navigate bureaucracy and administration they are required to go to a separate set of offices from domestic students. While international students require some specialized services, many do not. Students interviewed indicated that there was confusion about whether they were permitted to access students services outside of those specifically designated for international students. This is not just about administrative and bureaucratic efficiency and effectiveness; it is important to re-evaluate the best way of organizing the delivery of U of A programs and services to students with the goal of ensuring international students feel they can be both themselves and be a full part of the U of A.

#### 47. Expand institutional involvement with international students

The international student body at the U of A is comprised of a wide range of national, cultural, and religious backgrounds; a one-size-fits-all approach to fostering and enhancing good mental health and student engagement is inadequate to meet diverse needs. It is

strongly recommended that the University broaden its engagement with international students beyond the International Centre and University of Alberta International (UAI). While the International Centre is a valued resource, students reported that engagement at multiple university levels would enhance their sense of belonging to the institution.

#### 48. Re-design acculturation workshops

Designed by a committee comprised of faculty, staff, and students, a series of workshops should be offered to acculturate international students to Canadian cultural expectations, as well as prepare them for the personal challenges of adapting to a new culture that inevitably pop up. Graduate student focus group participants strongly endorsed this approach. Graduate students indicated they felt overwhelmed by receiving critical information in a short time frame and would have appreciated receiving information incrementally over the academic term to reinforce the acculturation information delivered in orientations. By virtue of their interactions with undergraduate and graduate students in a multitude of settings, faculty members, support staff, and senior students have insight into acculturation issues that international students face. The addition of diverse perspectives into orientation seminars was identified as important to include in the future.

#### 49. Encourage help seeking in the international student body

Research indicates that help-seeking rates are lower in international students than in domestic student populations. In interviews and focus groups, international students indicated that many are unaware that they can access health and wellness services on campus that are

available to other students. Student advisors should be well versed in directing students to the appropriate mental health services on campus and peer support groups. It is also important to reinforce that all students have access to all student services on campus and that international students are not excluded from using these services because of their status.

#### 50. Expand social interaction and support structures for international students

Social supports are critical to adjustment to Canadian life. It is recommended that peer support structures be facilitated on campus through enhanced mentorship programs and peer-to-peer outreach programs that are facilitated by and engage, the whole university. In addition, facilitating informal programs that encourage alumni/faculty/student engagement through 'Adopt a Student' programs are recommended. While large, well-developed cultural associations exist, they tend to have minimal involvement in mental health related initiatives. Students indicated their willingness to be involved in the development of online resources that include information about culture shock and adjustment to Canadian society. This would allow students to access information despite a reluctance to seek face-to-face assistance.

#### 51. Create opportunities for community participation during extended holiday periods

Programs to meet the needs of international students who remain on campus during extended holiday periods should be developed. The lack of availability of food services, building access and community involvement are issues of concern. International students reported feeling overlooked, abandoned, and experienced a heightened sense

of isolation, alienation and loneliness when the University was closed.

## 52. Provide routinely scheduled acculturation opportunities with alumni, faculty, and staff

Regularly scheduled informal gatherings that involve domestic faculty and staff are strongly recommended. The iGraduate International Student Barometer (2011) survey results indicated that a sense of isolation and lack of community involvement with Canadians are issues of concern for many. While international students reported that they received support for administrative issues related to enrolment, visa acquisition, and procedural issues, they would benefit from enhanced support for acculturation challenges. Alumni, faculty, and staff can provide significant support and mentorship to international students through the development of programs designed to increase the opportunities for social interactions. The International Centre is well suited to taking the lead on this initiative.

## ENHANCE OUTREACH INITIATIVES

### 53. Engage alumni in supporting mental health initiatives on campus

The U of A Alumni Association is an active and visible organization that represents the face of the University in the public arena. As such, alumni campaigns that focus specifically on the student mental health and wellness would be seen as highly credible and could raise the profile of the University's initiative to be seen as a student-friendly post-secondary institution of choice. Alumni could become advocates and ambassadors in the community-at-large to assist in endorsing mental health initiatives on the U of A campuses. Well es-

tablished student outreach programs such as the hosting program by alumni for students should be expanded to include the provision of mentorship programs for students who require social support to be successful in their academic pursuits. Simple outreach programs, such as the Alumni Association sending letters of welcome to students upon admission to the university would help incoming students to feel part of, and connect with, the institution-at-large prior to stepping foot on our campuses.

### 54. Explore a Memorandum of Understanding between Alberta Health Services and the University

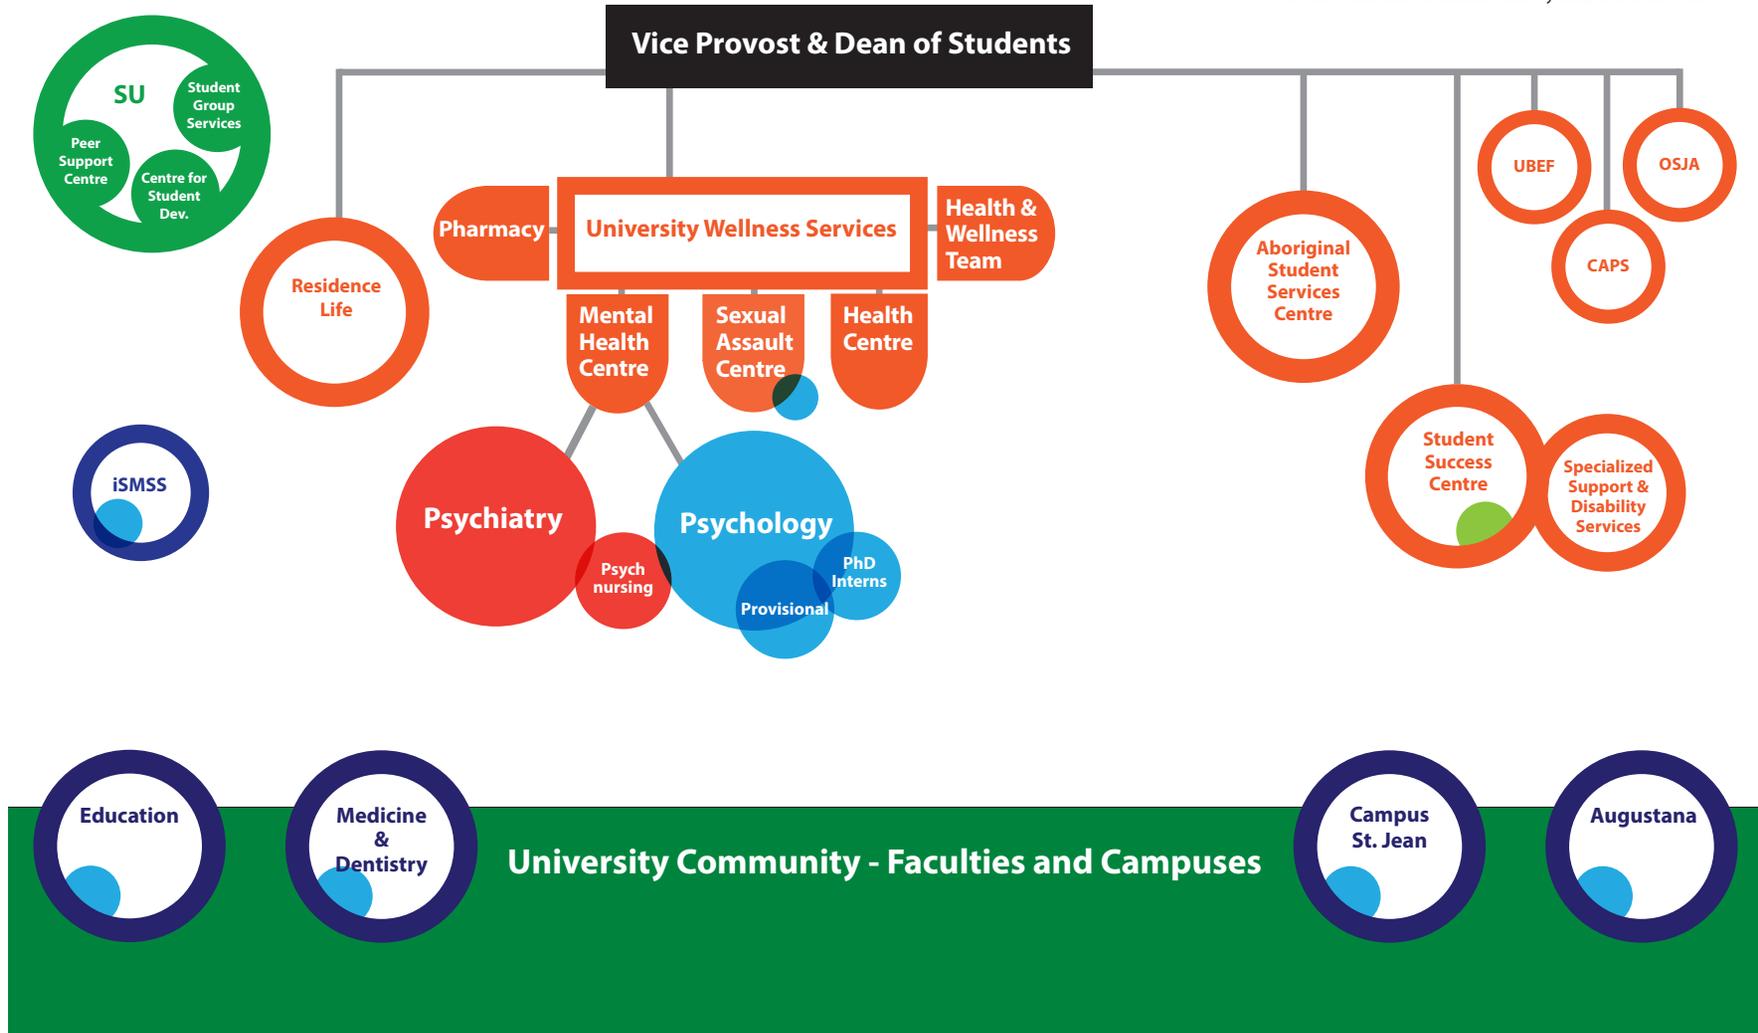

Currently, students return to campus following hospitalization for mental illness without notification to the institution. A formalized relationship with Alberta Health Services would ensure that students receive the care they require following hospitalization for suicide attempts or severe psychological problems. A protocol for obtaining student consent to share information would need to be developed. Networks for consultation and communication of relevant information would allow the University to determine whether the students' needs can be met within the institution or whether the student be encouraged to seek resources in the community. Of particular concern are international students and students in residences who may not have the necessary family or community supports available to them when they are released from hospital.

# APPENDIX A

## Mental Health Services - Old Structure University of Alberta, prior to 2013

### Legend

- Social Worker
- Psychologist/Counsellor services
- SU Students Union
- GSA Graduate Student Association
- OSJA Office of Student Judicial Affairs
- CAPS Careers and Placement Services
- UBEF University Bursaries and Emergency Funding
- iSMSS Institute for Sexual Minority Studies and Services

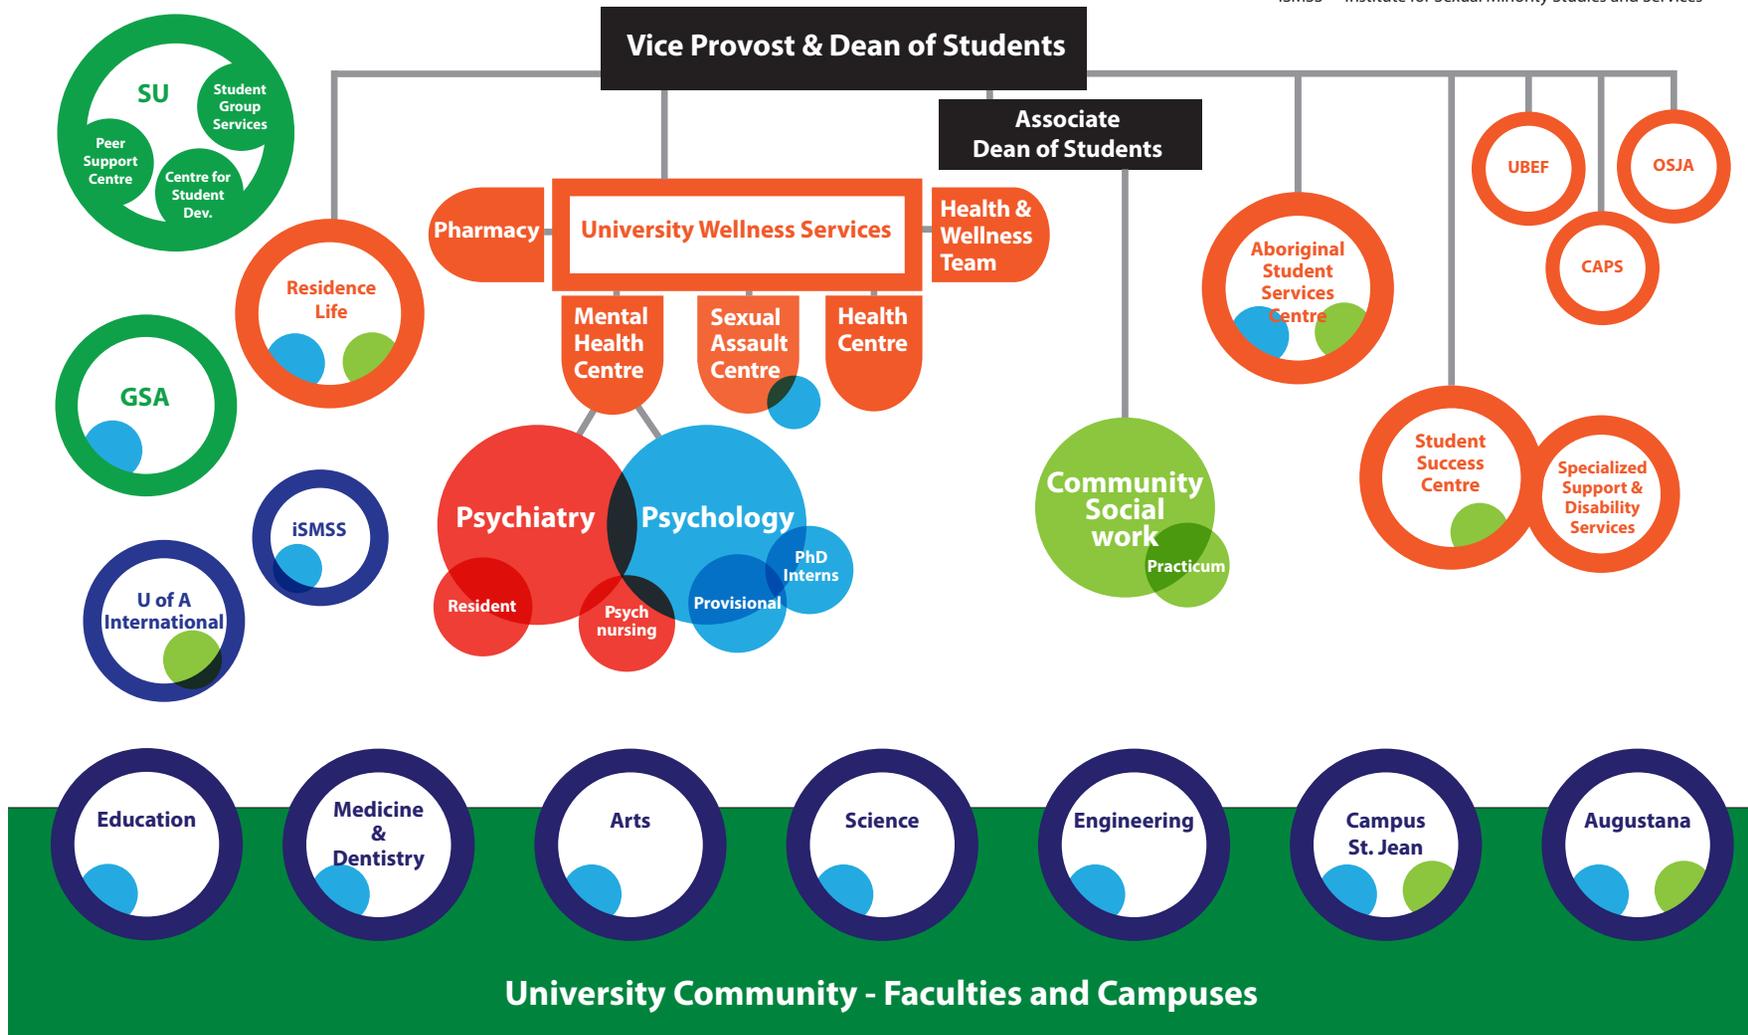

# APPENDIX B

## Mental Health Services - New Structure University of Alberta, Summer 2013

### Legend

- Social Work team involved
- Psychologist/Counsellor services
- SU Students' Union
- GSA Graduate Students Association
- OSJA Office of Student Judicial Affairs
- CAPS Careers and Placement Services
- UBEF University Bursaries and Emergency Funding
- iSMSS Institute for Sexual Minority Studies and Services

# APPENDIX C

## Extend and Augment HIAR initiative

The University of Alberta developed the Helping Individuals at Risk policy and procedure housed within the Office of Safe Disclosure and Human Rights in 2010 that helps identify students and staff who demonstrate disturbing behaviors. “The purpose of this Policy is to: Provide assistance to individuals at risk of harming themselves or others, before a situation escalates; Facilitate early identification of At Risk Behavior; and Provide a confidential, centralized location for reports of At Risk Behavior to be received and consolidated.” (Retrieved from [www.osdhr.ualberta.ca/HIAR.aspx](http://www.osdhr.ualberta.ca/HIAR.aspx).) It is designed as a ‘connect the dots’ program for behavioural issues and has been positively received across campus. In addition to the HIAR program, the faculties of Science and ALES currently have structures in place to monitor first year students’ academic progress and offer assistance to them if they are at risk of academic failure.

Early alert programs designed to identify behaviourally and academically at-risk students have emerged on campuses over the last 10 years. A confidential and secure software program is used to facilitate comprehensive early intervention outreach programs that flag struggling students with the intent to provide the earliest possible referrals to support services (Education Advisory Board, 2012). The programs are not intended to be punitive but rather to identify students who may benefit from early intervention, whether psychological, medical or academic. Collecting information from disparate sources across campus into a centralized, secure and confidential

database prevents students from falling through the cracks. Early identification allows the University to engage the student earlier rather than later so that they can receive referrals to academic supports or mental health assistance.

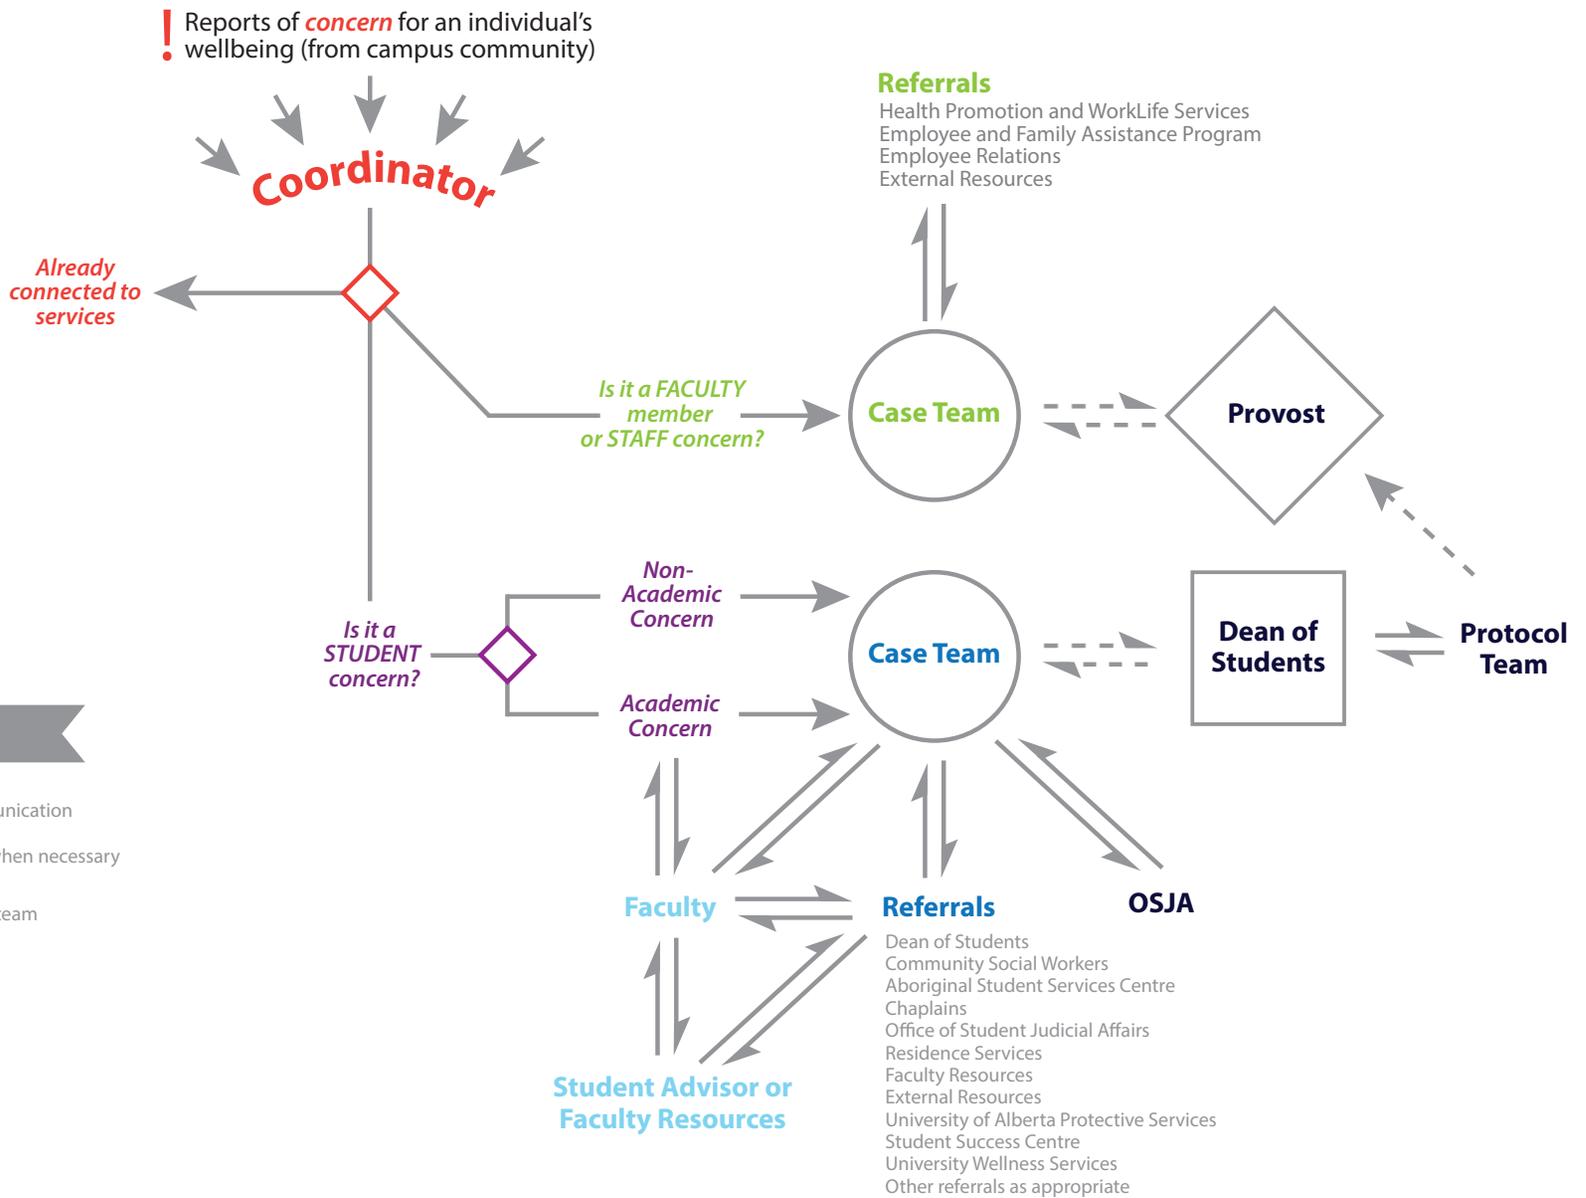

The identification of academic concerns, in addition to the current focus on behavioural concerns extends our current HIAR program and policy and will allow the identification of students who are struggling so that they can be connected with the appropriate university or community resources to mitigate their issues. The addition of a software program will make the process more streamlined and manageable. A case management team will be created that evaluates complex cases to ensure that individualized and appropriate interventions are provided to the student. In order for the extended initiative to be successful, there must be a comprehensive and extensive education strategy designed to teach the benefits to students and the institution.

The process following identification of a struggling student allows for a case-by-case response that is appropriate to the individual situation using a decision making framework that provides a defensible structure. In order to educate the campus community that the true intent of the program is to provide information and support to struggling students, consistent outreach and training for everyone in the academy is required. An easily accessible system to identify students needing support facilitates coordination and communication across the campus thus breaking down the silos of information (The Jed Foundation, 2006)

## The successful implementation of an extended HIAR program will require:

- 1 A revision of the mission and mandate of the Helping Individuals at Risk program
- 2 Modification of HIAR policy to include the academic component
- 3 IT involvement to integrate Early Alert software to Peoplesoft (underway)
- 4 Working with the U of A general counsel, information and privacy officer, and VP Finance and Administration to ensure appropriate procedures and record keeping issues are adequately addressed (Business Plan and Personal Information Assessment) (underway)
- 5 Modifying university policy to ensure that the program has adequate ability to enforce decisions consistently across our campuses (ie: medical leave policy; faculty policies; medical information upon re-admission or re-entry to university)
- 6 Creating two multidisciplinary case management teams: One case management team deals with student issues; A separate team deals with faculty, APO and staff issues
- 7 The development of a decision tree to guide intervention strategies: one decision tree for student issues; one decision tree for faculty and staff issues
- 8 Preparing orientations, training and education programs for faculty, APOs and staff across the University

# Proposed Helping Individuals At Risk (HIAR)

# CONSULTATIONS

Over the term of my appointment, I regularly consulted with, and/or interviewed, service providers and stakeholders, both individually and collectively. This included graduate student and undergraduate student focus groups; the Graduate Student Association Executive and Graduate Association Council; individual graduate students; Student's Union Executive and Student's Union Council; University Wellness administrators; Mental Health Centre psychologists, psychiatrists and psychiatric nurse; Director of Student and Residence Services, Augustana; Campus St. Jean, faculty and mental health counsellors; International Centre administration and advisors; social workers; Peer Support Centre directors; Student Success Centre personnel, Sexual Assault Centre personnel, Aboriginal Student Services Centre personnel; social workers; Health and Wellness Team members; Helping Individuals at Risk coordinator; Office of Safe Disclosure and Human Rights; International Centre personnel; international graduate students; Residence Services including the Director, Associate Director, Residence Coordinators and residence administrators; Institute for Sexual Minority Studies and Services personnel; senior university administrators; support staff in the Dean of Students office; support staff from across the University; Ombudservice; HPaWs; the Office of Sustainability personnel; Associate Deans; Deans; Vice-Provosts; Chairs; and in-faculty mental health service providers.

The external stakeholders that were consulted included personnel from Alberta Health Services; hospital administrators; Canadian Mental Health Association; Canadian Association of Colleges and University Student Services directors; American College Health Association members; and senior administrators, service providers, and students from national and international post-secondary institutions.

Dear Acting Provost Ferguson-Pell and Vice-President Clark,

As international students of the University of Alberta, we are aware of the financial struggles that our institution currently is in. We are also aware that the International Differential Fee (IDF) is being looked at, and would like to request answers to our following questions, in hopes that our perspectives can be considered when assessing our fees.

1. What are the key factors in determining the IDF?
2. Why isn't the IDF openly discussed like tuition and fees?
3. Why is an international differential applied to market modifiers as well?
4. How much does it cost the University of Alberta to educate an international student?
5. Why are you bringing us here to the University of Alberta? What is our role on campus, and how do we fit into the larger picture of the institution's strategic plan?
6. Please provide a strategic plan around how International Student Services will meet our needs, and how you plan to help us integrate with Canadian culture and domestic students.

Costs are already high, and support for international students is already lacking. We are worried about the well-being of prospective students if costs continue to increase without adequate improvement to student services.

We beg you to open up the conversation around the IDF, and consider our concerns.

Sincerely,

International Students of the University of Alberta

## **Student Groups Procedure**

<b>Office of Administrative Responsibility:</b>	Dean of Students
<b>Approver:</b>	General Faculties Council Executive Committee
<b>Scope:</b>	Compliance with this University procedure extends to all members of the University community.

### Overview

The University recognizes that participation in the activities of **Student Groups** is a beneficial aspect of the University experience. The University environment encourages the formation of different Student Groups. These groups may be defined in a variety of ways, according to, for example, a shared program of study, a commitment to service, a common activity, philosophy or background or particular perspective. When considering a group’s application for **Registration**, the University takes into account the group’s stated purposes, goals, activities, membership criteria and other attributes. The University desires to support the activities of Student Groups, but also recognizes the need to regulate them for the benefit of the groups themselves and the University community. When a Student Group is **Recognized** by the University, responsibilities and benefits result for both.

When sponsoring or conducting a **Student Group Event or Activity**, Student Groups are also accountable to the University for the conduct of their members and/or guests. While Student Group status is considered in this Procedure, complaints regarding the conduct of individual members of a group and their guests will be addressed under the Code of Student Behaviour and/or through other University policies, procedures or other appropriate processes.

### Purpose

To outline the University’s processes for the administration of Student Groups.

## **PROCEDURE**

### 1. RESPONSIBILITIES AND BENEFITS

In Registering with the University, a Student Group accepts the following responsibilities:

- To abide by all University policies and procedures, and all applicable municipal bylaws, Provincial and Federal statutes and regulations;
- To uphold the good name of the University;
- To live up to the group's stated purpose by acting in accordance with the group’s constitution, bylaws and polices;
- To respect the safety, security and inherent dignity of each member of the University community;
- To be responsible for members' conduct when members are representing the group, and therefore the University, on and off-campus; and
- To manage the group’s assets (financial or otherwise) in a responsible and ethical manner.

A Student Group enjoys a number of benefits, including:

- Ability to book space at the University;
- Use of the University's institutional liquor licenses and the ability to receive permission for gaming events;
- Use of the University's name and insignia;
- Exclusive use of the group's name on campus;
- Access to and ability to rent University property and equipment;
- Use of campus facilities for solicitation of membership.

All of the above benefits are subject to applicable University of Alberta policies, procedures and regulations.

This Procedure in no way limits the freedom of students and others to associate; however, groups of students not **Recognized** by the Dean of Students will not have access to the above benefits.

## 2. REGISTRATION REQUIREMENTS

In order to be **Recognized** as a Student Group, approval must be obtained by following these registration procedures.

Student Groups must file a Registration application annually with the University through Student Group Services. In addition to Registering with the University, Student Groups may also register with the Students' Union or the Graduate Students' Association subject to meeting the additional requirements for those organizations.

To become a Recognized University of Alberta Student Group, a group must complete the appropriate Registration Form (available on [www.bearshden.ualberta.ca](http://www.bearshden.ualberta.ca)) and must be able to provide satisfactory evidence of the following:

- That a minimum of ten (10) students are members of the group and that all of the executive members are currently part-time or full-time University of Alberta students. When groups have more than ten (10) student members, the remaining ratio of members must be comprised of two-thirds current University of Alberta students. In relation to **Fraternities** and **Sororities**, the membership must be composed entirely of part-time or full-time University of Alberta students registered during the current academic year.
- That an acceptable constitution exists. (Guidelines for drafting a group constitution are available from Student Group Services.) The constitution must:
  - Outline the purpose of group;
  - Outline the membership eligibility;
  - Outline the executive and membership roles and responsibilities;
  - Demonstrate that the group functions in a democratic manner by outlining the elections process;
  - Outline financial requirements that meet or exceed the University's requirements as outlined below, and address what will happen to any assets, financial or otherwise, if the group should cease to exist for whatever reason.
- That a minimum of one general meeting is scheduled during the next twelve months.
- That, in the case of groups previously Recognized, a minimum of one general meeting has been held during the past twelve months.
- That, if the group is handling money, the appropriate financial arrangements are in place, including:
  - A bank account in the name of the group, or an acceptable alternative;
  - A requirement that at least two signatures of executive officers are necessary for all banking transactions;
  - The direction that all monies of the Student Group go toward the operating expenses of the group, as it carries out its stated purpose/objectives/goals; and
  - The maintenance of financial records in proper order for possible auditing.

Based on the nature of the activities being organized by the Student Group, the Dean of Students may determine additional requirements, which may include, but are not limited to, additional oversight structures, additional risk management requirements, and additional insurance coverage.

In order for the Student Group to be Recognized, the University's liability and indemnification agreement must be signed by two members of a Student Group's executive prior to final approval.

### 3. REGISTRATION PROCEDURES

Once all registration forms and supporting documentation have been submitted, they will be reviewed in a timely manner and Student Group Services will notify the group as to its status. The Dean of Students will decide one of the following:

- To Recognize the Student Group for the year.
- To grant **Provisional Recognition**, subject to additional requirements. These may include, but are not limited to, any of the following:
  - Submit a complete membership list, including addresses and phone numbers;
  - Submit a financial statement for the preceding year (if an audit is necessary, the complete accounts for the group should be available);
  - Submit the minutes of general meetings held during the last twelve months;
  - Provide a bond in an amount to be determined by the Dean of Students, to be used to pay the cost of damage that may be incurred by the Student Group;
  - Report at specified periods to a specified University official; and
  - Such other reasonable requirements considered desirable to: limit the amount of risk incurred by the University; ensure that the Student Group provides reparation for harm done to the University community, University property or the property of others; or ensure the Student Group takes steps to build trust with the University or surrounding communities.
- To deny Recognition. In the case of denial of Recognition, the Dean of Students will provide written reasons for the decision.

A group's initial Registration with the Office of the Dean of Students may occur at any time of the year; re-Registration must be completed annually within three (3) months of the group's election of new executive members.

Where the Student Group receives Recognized or Provisional status, the president, treasurer and the individual responsible for event planning and risk management must attend training provided by Student Group Services. This must occur on an annual basis.

### 4. DENIAL, REVOCATION OR TEMPORARY SUSPENSION OF STUDENT GROUP RECOGNITION

- a. The Dean of Students may deny a group Recognition, or revoke or temporarily suspend Recognition, under any of the following circumstances:
  - The group fails to meet the requirements for Recognition outlined above in section 2;
  - The group's stated objectives or activities or the manner of carrying out its activities have exposed or would expose the University to unacceptable risk;
  - The group's stated objectives or activities or the manner of carrying out its activities have in the past or could, by their very nature, lead to justifiable complaints under University policies and procedures and/or municipal bylaws, Provincial or Federal statutes or regulations;
  - The group has engaged in activities involving **Hazing**, unacceptable **Risk to Persons**, or **Risk to Property or Reputation**;
  - The group tolerates, allows or encourages its members or executive to engage in any violation of the Code of Student Behavior when acting on behalf of or as a representative of the Student Group;

- The group fails to abide by the responsibilities outlined above in section 1; or
  - The group fails to meet the conditions required for their Provisional Recognition.
- b. A complaint against a Student Group relating to any of the circumstances set out in section 4(a) can be made, in writing, to the Dean of Students.
  - c. As part of the process of determining whether a Student Group should have their Recognition denied, revoked, or temporarily suspended, the Dean of Students may use the investigative expertise and resources within University of Alberta Protective Services or other entities as required.
  - d. If the group is dissatisfied with the decision of the Dean of Students, the group may submit a request for reconsideration to the Dean of Students. The request for reconsideration must be received by the Dean of Students no more than 15 Business Days after the group is notified of the Dean's decision. A request for reconsideration must set out the reasons why the group is seeking reconsideration and, if applicable, those steps the group proposes to take to correct any actions referenced in the decision. In cases where a student group is also registered with the Students' Union or the Graduate Students' Association, the Dean of Students will discuss the issue with the relevant students' association before making a decision.
  - e. If the group is still dissatisfied after the Dean of Students has made a decision on the request for reconsideration, it may make a written appeal of the decision to the Associate Vice President, Risk Management Services. The appeal must be received by the AVP Risk Management no more than 15 Business Days after the group is notified of the Dean's decision regarding reconsideration. The Associate Vice President, Risk Management Services may consult other appropriate or applicable University staff members in the decision making process. The appeal can include a request to meet with the AVP, Risk Management Services. In cases where a group is also registered with the Students' Union or the Graduate Students' Association, the AVP Risk Management Services will discuss the issue with the relevant students' association before making a decision. The AVP Risk Management Services will grant or deny the appeal based on an assessment of the level of risk to the University and will provide the decision in writing. The decision of the AVP Risk Management Services is final.
  - f. The denial, revocation or temporary suspension of Student Group Recognition will remain in effect throughout the appeal periods.

## 5. EVENT PLANNING AND STUDENT GROUP ACTIVITIES

Student Group Events and Activities are core to the functioning of Student Groups. Events and Activities can be organized both on-campus and off-campus. The responsibility for running the events in a safe manner belongs to the Student Group.

All Student Group Events and Activities must be approved by the Office of the Dean of Students. This approval must occur at the planning stage of the event and prior to any advertising or announcement of the event.

Student Groups are subject to all University policies and procedures and must adhere to these when organizing Events and Activities.

A Student Group that wishes to conduct a raffle, 50-50 draw or other activity that requires the issuance of a gaming license by the Alberta Gaming and Liquor Commission (the "AGLC") must request and receive permission prior to applying to the AGLC for a gaming license by submitting the Student Group Gaming Permission Form\* to the Office of Insurance and Risk Assessment (Risk Management Services) at least 30 days in advance of any proposed gaming activity. Permission to apply for a gaming license to the AGLC may be granted to a Student Group at the discretion of the Office of Insurance and Risk Assessment and receipt of permission from the Office of Insurance and Risk Assessment does not guarantee that the Student Group meets the requirements to obtain a gaming license from the AGLC.

Student Groups may not enter into legally binding agreements in the name of the University. Should a Student Group wish to enter into a legally binding agreement it shall ensure that such agreement does not contain any provisions that place any obligations on the University or that contravene, or cause the University to be in breach of, the terms of any agreement to which the University is a party.

Depending on the nature of the activity, the Dean of Students may require a Student Group to obtain additional insurance or require the presence of University of Alberta Protective Services or the Edmonton Police Service. The cost of these will be the responsibility of the Student Group.

The Dean of Students has the authority to deny or revoke approval for a Student Group Event or Activity (whether an Event or Activity is in progress or is scheduled to occur) if the Dean of Students reasonably believes that the Student Group Event or Activity has caused or will cause **Risk to Persons or Risk to Property or Reputation**.

If the group is dissatisfied with the decision of the Dean of Students, the group may submit a request for reconsideration to the Dean of Students. A request for reconsideration must be received by the Dean of Students no more than 15 Business Days after the group is notified of the Dean's decision. A request for reconsideration must set out the reasons why the group is seeking reconsideration and, if applicable, those steps the group proposes to take to correct any actions referenced in the decision. In cases where a student group is also registered with the Students' Union or the Graduate Students' Association, the Dean of Students will discuss the issue with the relevant students' association before making a decision. The decision of Dean of Students is final.

A number of relevant University policies and procedures apply to Student Groups and are listed under related links below.

## **DEFINITIONS**

Definitions should be listed in the sequence they occur in the document (i.e. not alphabetical).

Any definitions listed in the following table apply to this document only with no implied or intended institution-wide use. <a href="#">▲ Top</a>	
<b>Student Group</b>	A group of students which has applied to Register with and is Recognized by the Dean of Students. Examples include, but are not limited to a club, association, organization, society, fraternity or fellowship.
<b>Registration, Register</b>	The process by which a group requests Recognition by the Dean of Students in order to receive the benefits provided to a Student Group.
<b>Recognition, Recognized</b>	The acknowledgement of a Student Group for receipt of specific benefits as listed in Section 1 of this Procedure, at the discretion of the Dean of Students.
<b>Student Group Event or Activity</b>	Any student function organized by the Student Group for its members and their guests, on or off campus, including but not limited to, social events, demonstrations, events involving alcohol, travel, fundraising, guest speakers or physical activity.
<b>Fraternity or Sorority</b>	A student group formed for social purposes and dedicated to the positive development of its members. Members are initiated by invitation, and determined through democratic processes following a trial period used to gauge adherence to common values, aspirations and membership requirements.
<b>Provisional Recognition</b>	Recognition of a Student Group with specified additional conditions for continued Recognition.
<b>Hazing</b>	The creation of an environment or any intentional, reckless or negligent act, that occurs on or off University property, that i. endangers the physical health, mental health or safety of a person;

	<p>or</p> <p>ii. produces physical or mental discomfort, embarrassment, humiliation, harassment, or ridicule; or</p> <p>iii. results in the destruction, damage or removal of any public or private property; or</p> <p>iv. causes, induces, pressures, coerces, or requires another person to violate any federal, provincial, municipal or University regulations; for purposes that include, but are not limited to, initial or continued admission, affiliation or initiation with the group.</p> <p>Examples of hazing include, but are not limited to: any brutality of a physical nature, such as whipping, beating, branding, paddling, or electric shocks, exercise not legitimately related to a sport, forced consumption of alcohol or other substances, inappropriate exposure to the elements, compulsory nudity or immodest dress, transportation and abandonment, threats or implied threats, verbal abuse, physical or psychological abuse, sleep deprivation, physical confinement, coerced hazing of another, compulsory servitude, degrading activities, sexual simulation, sexual assault, or theft or misuse of others' property.</p> <p>Hazing can occur regardless of whether the subject(s) of the hazing have consented to participate in or be subjected to the activities in question, or whether the activities in question constitute a ritual or tradition of a group.</p>
<b>Risk to Persons</b>	Setting or creating an environment or circumstances which endangers or potentially endangers the health, safety or well being of individuals or groups
<b>Risk to Property or Reputation</b>	Setting or creating an environment which promotes or tolerates reputational, financial or physical damage to the University, the University community, or other individuals or groups

# STUDENTS' COUNCIL VOTES AND PROCEEDINGS

---

Tuesday October 8<sup>th</sup>, 2013  
SUBstage/ETLC 1-018

## VOTES AND PROCEEDINGS (SC 2013-11)

- 2013-11/1      **SPEAKER'S BUSINESS**
- 2013-11/1a      Announcements – The next meeting of Students' Council will take place on Tuesday, October 22nd, 2013
- 2013-11/2      **PRESENTATIONS**
- CHELEN/GRULKE MOVED TO** suspend standing orders to allow students at large to ask question about the presentation.
- Motion: CARRIED**
- KUSMU/LA MOVED TO** suspend standing orders to increase the presentation time to 7:00pm
- Motion: CARRIED**
- 2013-11/2a      Update on the University of Alberta's Budget - Presented by Acting Provost Martin Ferguson-Pell and Vice President Finance and Administration Phyllis Clark (Sponsored by President Petros Kusmu)/Councillor Zeng.
- The University of Alberta's Acting Provost Martin Ferguson-Pell and Vice President Finance and Administration Phyllis Clark will present to Students' Council an update on the University's budget. Furthermore, they will present to Students' Council their plans for changes to next year's tuition and fees.
- 2013-11/7      **GENERAL ORDERS**
- 2013-11/7a      **KELLY/BATAL MOVES TO** appoint one (1) member of Students Council to the APIRG Board of Directors
- Nominations: Zeng
- Nominations Closed
- Appointed: Zeng
- 2013-11/7b      **BATAL/MILLS MOVES TO** appoint one (1) member of Students Council to

the Policy Committee

Nominations: Mohamed, Banister

Nominations Closed

Appointed: Mohamed

**2013-11/3**      **EXECUTIVE COMMITTEE REPORTS**

Dustin Chelen, VP Academic- Report

Petros Kusmu, President- Report

**2013-11/4**      **BOARD AND COMMITTEE REPORTS**

Chloe Speakman, ERC Chair- Report

Cory Hodgson, Audit Committee Chair- Report

Natalia Binczyk, SCET Chair- Report

**2013-11/5**      **QUESTION PERIOD**

Question Period extended 15 minutes

**KUSMU/GRULKE MOVE TO** move in camera

**Motion: CARRIED**

**HODGSON/SPEAKMAN MOVED TO** move ex camera

**Motion: CARRIED**

**HODGSON/SPEAKMAN MOVED TO** extend question period an additional 15 minutes

**Motion: FAILED**

**2013-11/6**      **BOARD AND COMMITTEE BUSINESS**

**2013-11/6a**      **SPEAKMAN/ZENG moves that** Students' Council, on the recommendation of the Elections Review Committee, approve Bill #3 in first reading based on the following principle:

1. The deadline for the nomination of candidates in any by-election shall occur not less than 9 days prior to the election.

Speakers List: Speakman, Kelly

**Motion: CARRIED**

**GRULKE/NGUYEN MOVED TO** adjourn

**Motion: CARRIED**

**Meeting adjourned at 8:32pm**
